To Peel Council,  
regarding Stopping Highway 413

I live in North West Brampton, and have been active in this community for some years. Highway 413 will not serve this community. It is a fast truck route from Milton to King City, and cuts through the middle of Heritage Heights, Brampton's crown gem of planned communities. Climate change is on everyone's mind. We struggle to cut carbon emissions by making communities walkable & bike-able, and to protect natural heritage, local farm land, and water quality. Yet a highway that goes back to 50's style traffic engineering gets a green light from the Province; another item on this list of Doug Ford's failures. If it takes a Federal Environmental Assessment to stop Highway 413, then maybe we can have some certainty & closure to this perpetual waste of land use.

Thank you  
Janet Kuzniar
