Hi, emailing regarding HWY 413

We need a reduction in cars on the highway and more efficient uses of what we already have- not necessarily more routes which will destroy our environment. This needs to be a very calculated and well thought out collaborated decision among professional city planners and environmentalists. This feels incredibly rushed and 1 sided.

The federal government has made changes for 30% of employees to work from home, as should other government sectors and cities and of course individual companies. We have to have other solutions which minimize the destruction of our planet and therefore our selves. Environmentalists have to be a part of the conversation as do citizens like me.
