Stop The 413

We all know the environmental harm that building this highway will cause including accelerating the harbinger of climate change. Please do the right thing and say no to the land speculators and landowners who wish to profit by the sale of their land to developers.

We have transportation options available right now by utilizing the 407 more effectively for truck traffic. Providing subsidies to the transportation industry will cost less than building a new highway.

It is easier to develop green lands for commercial and real estate purposes but that doesn't mean it is the correct decision. Please do not support the 413 and advocate for a full federal environmental assessment.

Thank you

Chris McGlynn
