Covid-19 Vaccine Deaths Surpass 6,100, 272 Teens Hospitalized in June, Physician Bullied by Leaders

Ten deaths among women under the age of 45 have been reported for the six week period proceeding 6/18/2021 VAERS Report & a thirteen year old boys death is under investigation by the CDC who died three day post Covid-19 Pfizer vaccination

Recommended Companion Reading:

Over 2,400 Covid-19 Vaccine Associated Deaths Occurred in First Six Weeks of Program, Evidence CDC Back Loading Data

In this report:

- Headlines and this week's VAERS report update with individual case reviews. U.S. VAERS injury reports are nearing 400,000 and death reports now exceed over 6,100 as physicians continue to face disciplinary action for voicing legitimate and evidence based scientific concerns with the Covid-19 vaccination program. FDA to require warning for myocarditis on Moderna & Pfizer Covid-19 vaccination labels as researcher finds 'likely ties' with the investigative use mRNA gene line editing drugs a

nd heart inflammation.

-Teens continue to be hospitalized with heart failure and other severe Covid-19 vaccination side effects, as public health and medical leadership abandon all ethic, and place protection of the vaccine image over public health. 270 individuals between the ages of 0 - 24 were reported hospitalized after Covid-19 vaccination for the first 18 days of June.

The Headlines:

Canadian Physician Fired for Voicing Safety Concerns for Covid-19 Vaccines in Children:

The health professional community leadership is walking in the footsteps of Nazi Germany and the former Soviet Union in enacting panels to punish academics and health care professionals for contradicting government vaccine policy that is not backed by credible trial data:

LEAKED AUDIO, A Must Listen:

Here are the statements that earned Dr Christian his suspension: (full statement [HERE](#))

"Parents and children must at a minimum know the following before they give consent:

1. That the m-RNA vaccine is a new, experimental vaccine design and has never been used in humans before.
2. That the m-RNA vaccines have not been fully authorized by either Health Canada or by the CDC in the USA or in most nations around the world. In Canada, they are under "interim authorization." In the USA, the CDC has them under "emergency use authorization."

Full vaccine approval takes several years and multiple safety considerations – this has not happened with the mRNA vaccines.

3. That in order to qualify for "emergency use authorization" there must be an emergency. For the elderly population, for the vulnerable, for health care workers, there is of course an emergency – several thousand people in Canada have died of covid-19. But the mean age of those who have died is 83.8. There is therefore a strong case for vaccinating the elderly, the vulnerable and health care workers. Covid-19 does not pose a threat to our kids. The risk of them dying of covid is less than 0.003% - this is even less than the risk of them dying of the flu. There is no emergency in children.

4. That children do not readily transmit the covid virus to adults – and adults should be immune or vaccinated anyway. In many countries teachers had significantly lower rates of covid-19 than the general population.

5. That the m-RNA vaccines have already been associated with several thousand deaths in the Vaccine Adverse Reporting System maintained by the US government. These appear to be unusual, compared to the total number of vaccines administered, but they are a strong signal and cannot be ignored. As of 4 June 2021 and in the period of only of few months, 5,888 deaths have been associated with the m-RNA vaccines. These are associations and not verified yet as causations, but in any other drug or vaccine they would have been sufficient to stop the whole program – a pause, a regrouping and certainly a big signal to not give it to our kids.
(<https://www.openvaers.com/covid-data>)

6. That the m-RNA vaccine is already causing serious medical problems for kids all over the world. There is a real and significantly increased risk of a condition called myocarditis – inflammation of the heart for those kids vaccinated with the m-RNA vaccine. Myocarditis is a serious condition with long term implications for some children. Some children can die with myocarditis. This has been sufficient to make the German national vaccine agency to not recommend the vaccine to healthy children and adolescents. The UK vaccine agency, according to a report in the Daily Telegraph is also not authorizing the vaccine for kids. Tomorrow the CDC is meeting in emergency session to discuss this issue – there is a good likelihood that they too will call for a pause in vaccinating our kids. When will Health Canada act? The principle of avoiding harm is paramount.

7. The benefit of the vaccine in preventing covid-19 for kids is marginal at best in the small trials that were done. The ARR (Absolute Risk Reduction) is less than 2%. Small trials, like the Pfizer trials cannot detect real risk and cannot address medium and long term side effects

Dr Fracis Christian was correct, btw, in his statement to the committee that the WHO was not recommending child vaccination with Covid-19 investigative use drugs:

WHO statement from official website as of the morning of June 23, 2021, changed the same afternoon:

...are pregnant (or you are already breastfeeding, you should continue after vaccination)

- Have a history of severe allergies, particularly to a vaccine (or any of the ingredients in the vaccine)
- Are severely frail

Children should not be vaccinated for the moment.

There is not yet enough evidence on the use of vaccines against COVID-19 in children to make recommendations for children to be vaccinated against COVID-19. Children and adolescents tend to have milder disease compared to adults. However, children should continue to have the recommended childhood vaccines.

WHAT SHOULD I DO AND EXPECT AFTER

- Have a compromised immune system
- Are pregnant (if you are already breastfeeding, you should continue after vaccination)
- Have a history of severe allergies, particularly to a vaccine (or any of the ingredients in the vaccine)
- Are severely frail

Children and adolescents tend to have milder disease compared to adults, so unless they are part of a group at higher risk of severe COVID-19, it is less urgent to vaccinate them than older people, those with chronic health conditions and health workers.

More evidence is needed on the use of the different COVID-19 vaccines in children to be able to make general recommendations on vaccinating children against COVID-19.

WHO's Strategic Advisory Group of Experts (SAGE)

Canadian physicians have organized a petition to push back against leadership orders to remain silent on Covid-19 vaccination concerns. Read and sign [HERE](#).

Dr Robert W Malone, Inventor of mRNA technology voices serious safety Concerns over Covid-19 Vaccinations, Warns Spike Proteins Circulating in Blood:

Video Interview Clip:

FDA Issues Warning Label for Likely Association Between Pfizer & Moderna mRNA Gene Line Editing Inoculations and Myocarditis

"Now, Wednesday's news that U.S. experts concluded there is a "likely association" between rare cases of heart inflammation and mRNA vaccines has finally presented the Pfizer-BioNTech and Moderna shots with a dose of adversity. The FDA said it will move quickly to require the companies to add a label warning that young adults and adolescents are susceptible to the side effect".

VAERS Data Review for Week Ending 6/18/2021

***Note: 83% of VAERS Reports are generated from medical providers, state reporting agencies, and pharmaceutical companies. European reporting systems are documenting exponentially higher rates than VAERS data, as the 30 year old monitoring system captures only 1% of post vaccination injuries per Harvard research report. Low capture rate is central issue not credibility. FDA has admitted the mass vaccination program began without adequate safety monitoring system. A recent study from Mass General, Bingham documented anaphylactic reactions post Covid-19 vaccine occurring up to 120x the rate reported to the CDC. This highly suggests the system is continuing to vastly under capture post vaccination adverse events.

-There is no mid or long term safety or efficacy data whatsoever on any Covid-19 vaccination, any health professional or public health officials making safety claims on lack of data is in breach of basic medical and scientific ethic, purporting non-evidence based claims as statements of fact.

VAERS Injury & Event Outcome Report for period ending 6/18/2021

National Vaccine Information Center
Your Health. Your Family. Your Choice.

MedAlerts Home

Search Results

From the 6/18/2021 release of VAERS data:

Found 387,087 cases where Vaccine is COVID19

Table

Event Outcome	Count	Percent
Death	8,103	1.58%
Permanent Disability	5,112	1.34%
Office Visit	72,964	18.79%
Emergency Room	48	0.01%
Emergency Doctor/Room	49,508	12.79%
Hospitalized	21,734	5.61%
Hospitalized, Prolonged	40	0.01%
Recovered	162,761	41.99%
Birth Defect	191	0.05%
Life Threatening	4,455	1.15%
Not Serious	152,877	39.46%
TOTAL	1,458,431	1,118.88%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 387,087 (the number of cases found), and the Total Percentage is greater than 100.

Over 31,00 US citizens have now reported serious injuries in association with Covid-19 vaccination:

From the 6/18/2021 release of VAERS data:

Found 31,240 cases where Vaccine is COVID19 and Serious

Table

Event Outcome	Count	Percent
Death	6,913	22.13%
Permanent Disability	5,112	16.36%
Office Visit	7,459	23.88%
Emergency Room	4	0.01%
Emergency Doctor/Room	11,381	36.43%
Hospitalized	21,734	69.57%
Hospitalized, Prolonged	40	0.13%
Recovered	5,756	18.42%
Birth Defect	71	0.23%
Life Threatening	4,455	14.26%
TOTAL	1,46,171	2,210.81%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 31,240 (the number of cases found), and the Total Percentage is greater than 100.

Over 12,500 of reports of serious injury have been submitted for Moderna vaccination, over 4,000 permanently disabled or died:

From the 6/18/2021 release of VAERS data:

Found 12,537 cases where Vaccine is COVID19 and Manufacturer is MODERNA and Serious

Table

Event Outcome	Count	Percent
Death	2,110	16.82%
Permanent Disability	1,881	15.00%
Office Visit	2,035	16.23%
Emergency Room	2	0.02%
Emergency Doctor/Room	3,719	29.66%
Hospitalized	3,840	30.62%
Hospitalized, Prolonged	30	0.24%
Recovered	2,889	23.03%
Birth Defect	10	0.08%
Life Threatening	1,117	8.91%
TOTAL	1,26,385	1,010.88%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 12,537 (the number of cases found), and the Total Percentage is greater than 100.

Over 175, 000 total injury reports have been submitted for Moderna, Covid-19 Vaccine:

Search Results			
From the 6/18/2021 release of VAERS data:			
Found 175,405 cases where Vaccine is COVID19 and Manufacturer is MODERNA			
Table			
Event Outcome	Count	Percent	
Death	2,355	1.32%	
Permanent Disability	1,865	1.06%	
Office Visit	23,648	13.48%	
Emergency Room	18	0.01%	
Emergency Doctor/Room	26,020	14.83%	
Hospitalized	4,846	2.75%	
Hospitalized, Prolonged	37	0.02%	
Recovered	88,186	50.27%	
Birth Defect	79	0.04%	
Life Threatening	2,147	1.22%	
Not Serious	67,117	38.29%	
TOTAL	175,405	100.00%	

1 Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 175,405 (the number of cases found), and the Total Percentage is greater than 100.

Over 15,600 serious injuries have been reported with the Pfizer/Biontech vaccine, with almost 6,000 reports of permanent disability or death:

From the 6/18/2021 release of VAERS data:			
Found 15,664 cases where Vaccine is COVID19 and Manufacturer is PFIZER/BIONTECH and Serious			
Table			
Event Outcome	Count	Percent	
Death	2,196	13.99%	
Permanent Disability	2,660	16.98%	
Office Visit	3,817	24.37%	
Emergency Room	2	0.01%	
Emergency Doctor/Room	6,827	43.58%	
Hospitalized	10,583	67.55%	
Hospitalized, Prolonged	10	0.06%	
Recovered	2,103	13.42%	
Birth Defect	48	0.31%	
Life Threatening	1,112	7.10%	
TOTAL	15,664	100.00%	

1 Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 15,664 (the number of cases found), and the Total Percentage is greater than 100.

Over 170,000 reports of injury submitted for Pfizer Biontech in total

From the 6/18/2021 release of VAERS data:			
Found 170,610 cases where Vaccine is COVID19 and Manufacturer is PFIZER/BIONTECH			
Table			
Event Outcome	Count	Percent	
Death	2,196	1.28%	
Permanent Disability	2,660	1.56%	
Office Visit	32,303	18.94%	
Emergency Room	20	0.01%	
Emergency Doctor/Room	26,362	15.45%	
Hospitalized	41,583	24.37%	
Hospitalized, Prolonged	10	0.01%	
Recovered	58,110	34.06%	
Birth Defect	50	0.03%	
Life Threatening	1,112	0.65%	
Not Serious	68,110	39.94%	
TOTAL	170,610	100.00%	

1 Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 170,610 (the number of cases found), and the Total Percentage is greater than 100.

Janssen Johnson & Johnson (under very limited distribution due to mass contamination of 60 million doses) recorded over 2,900 severe events:

Search Results			
From the 6/18/2021 release of VAERS data:			
Found 2,919 cases where Vaccine targets COVID-19 (COVID19) and Manufacturer is JANSSEN and Serious			
Table			
Event Outcome	Count	Percent	
Death	430	14.73%	
Permanent Disability	474	16.23%	
Office Visit	705	24.15%	
Emergency Doctor/Room	1,296	44.40%	
Hospitalized	2,242	76.80%	
Hospitalized, Prolonged	5	0.17%	
Recovered	471	16.14%	
Birth Defect	4	0.14%	
Life Threatening	714	24.46%	
TOTAL	2,919	100.00%	

1 Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 2,919 (the number of cases found), and the Total Percentage is greater than 100.

J&J registers over 40,000 total injury reports:

Search Results		
From the 6/18/2021 release of VAERS data:		
Found 40,452 cases where Vaccine targets COVID-19 (COVID19) and Manufacturer is JANSSEN		
Table		
Event Outcome	Count	Percent
Death	15	0.04%
Permanent Disability	36	0.09%
Office Visit	6,707	16.58%
Emergency Room	1	0.00%
Emergency Doctor/Room	1,452	3.59%
Hospitalized	2,242	5.54%
Hospitalized, Prolonged	1	0.00%
Recovered	11,767	29.09%
Birth Defect	0	0.00%
Life Threatening	776	1.92%
Not Serious	17,138	42.36%
TOTAL	147,386	100.00%

1 Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 40,452 (the number of cases found), and the Total Percentage is greater than 100.

Over 700 serious injury adverse events have been recorded for all Covid-19 vaccinations including 15 deaths and 36 permanent disabilities in ages 0 - 19:

From the 6/18/2021 release of VAERS data:		
Found 739 cases where Age is under-19 and Vaccine is COVID19 and Serious		
Table		
Event Outcome	Count	Percent
Death	15	2.03%
Permanent Disability	36	4.87%
Office Visit	163	22.06%
Emergency Doctor/Room	788	106.63%
Hospitalized	674	91.21%
Hospitalized, Prolonged	1	0.14%
Recovered	298	40.33%
Birth Defect	0	0.00%
Life Threatening	141	19.09%
TOTAL	1,014	137.21%

1 Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 739 (the number of cases found), and the Total Percentage is greater than 100.

Over 14,000 Injuries for ages 0 -19 total:

From the 6/18/2021 release of VAERS data:		
Found 14,365 cases where Age is under-19 and Vaccine is COVID19		
Table		
Event Outcome	Count	Percent
Death	15	0.10%
Permanent Disability	36	0.25%
Office Visit	1,833	12.76%
Emergency Room	1	0.01%
Emergency Doctor/Room	1,682	11.71%
Hospitalized	674	4.69%
Hospitalized, Prolonged	1	0.01%
Recovered	6,664	46.45%
Birth Defect	4	0.03%
Life Threatening	141	0.98%
Not Serious	5,560	38.74%
TOTAL	14,436	100.42%

1 Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 14,365 (the number of cases found), and the Total Percentage is greater than 100.

Individual VAERS Case Reports include:

13 year old California boy experienced heart failure one day post Pfizer vaccination and hospitalized for 8 days with the following symptoms:

Acute renal failure (broad), Cardiac failure (broad), Liver related investigations, signs and symptoms (narrow), Anaphylactic reaction (broad), Acute pancreatitis (broad), Asthma/bronchospasm (broad), Haematopoietic erythropenia (broad), Haematopoietic leukopenia (narrow), Haematopoietic thrombocytopenia (narrow), Haemorrhage laboratory terms (broad), Hyperglycaemia/new onset diabetes mellitus (narrow), Neuroleptic malignant syndrome (broad), Systemic lupus erythematosus (narrow), Myocardial infarction (narrow),

Full VAERS Report:

10.3-13

Individuals under age 50 have a 99.97 survival rate for Covid-19 attributed infections according to CDC data. The risk of a person dying under 20 is virtually zero, with Covid-19 attributed deaths occurring concurrently 70% of the time with serious other health conditions.

There is no emergency to justify emergency use FDA authorization of new technology drugs.

<https://www.unite4truth.com/post/covid-19-vaccine-deaths-surpass-6-100-272-teens-hospitalized-in-june-physician-bullied-by-leaders>

Christine Massey M.Sc.
Peterborough, ON

FOI responses from 73 institutions (including Public Health Agency of Canada, Health Canada, the U.S. Centers for Disease Control and Prevention) in **20 countries/jurisdictions** show that the world's health/science institutions have NO RECORD of "SARS-COV-2" purification, by anyone, anywhere, ever, thus *no record of any scientific study or sequencing* of the particles alleged to be "the COVID-19 virus", and thus zero proof that a "COVID-19 virus" is the cause of any illness or death:
<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification/>
