**Subject:** Land use boundary expansion

We here in Ontario are fighting a critical issue. Municipalities are being forced by a dictatorial government to use farmland to expand city boundaries for the purpose of development. The farmland in this part of Ontario is prime agricultural land and is necessary to feed us for years to come. To use this land to build housing is criminal. Already many parts of the world are lacking enough food to feed the people.

The greatest issue is that developers are only interested in building houses that are more expensive so they will not solve the housing crisis.

I appeal to Peel region to stop urban sprawl and protect the farmland.
