Stop Peel Sprawl

The Problem

Loss Of Trees

Trees are key element for humans to live.

- “Every year, Canada clearcuts a million acres of boreal forest, or seven NHL hockey rinks per minute. From 2001 to 2017, Canada lost nearly 40 million hectares of forest — releasing huge amounts of carbon into the atmosphere equivalent to the annual emissions of nearly 321 million cars”.

Endangered Wildlife

We may not notice but the wild life is very important for us. (squirrels, birds, etc)

- “Their biggest contribution to the forest is in shaping plant composition. They have a peculiar habit of taking seeds, which are their main source of nutrients, and burying them”.

Pollution

With all of the development, pollution has and will increase where it will be very hard for us to breath.

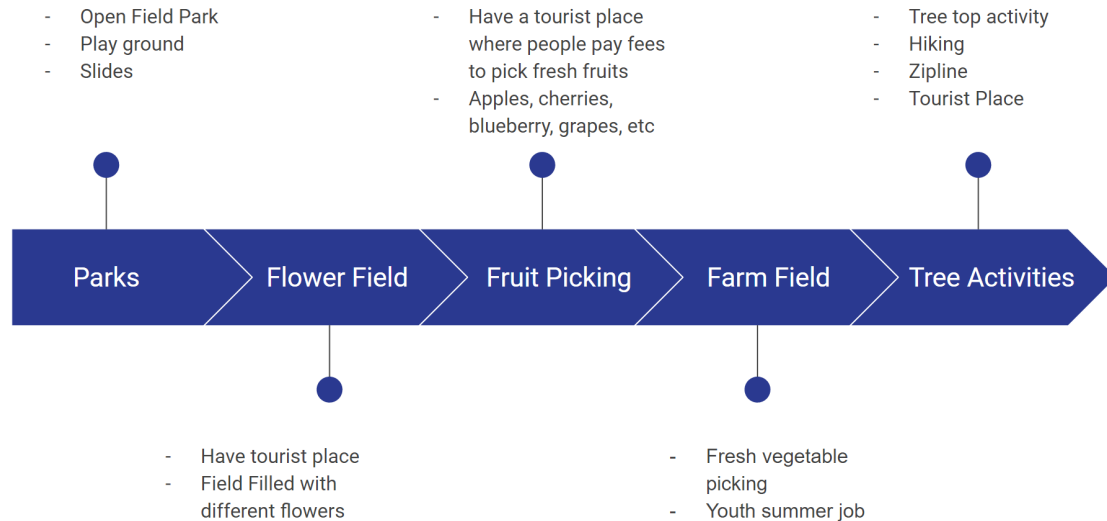

- “Pollutants that are freely released into the air as well as land and water pollutants, are the most harmful. Harmful air pollution poses a bigger threat to youngsters because of their smaller physical size and smaller respiratory organ capacity”.

These are just a few issues. There are many more

These are some alternatives where the government can make profits as well

Australia, Netherlands, and Switzerland have sustained their greenery by not cutting it down but making it into a tourist place. Canada does not need to be a tourist place but we should keep our beauty because this beauty is what we need to live.
