The Honourable Steve Clark
Minister of Municipal Affairs and Housing
College Park 17th Floor
777 Bay Street
Toronto, ON M7A 2J3

RECEIVED
March 21, 2023
REGION OF PEEL
OFFICE OF THE REGIONAL CLERK

Dear Minister Clark,

RE: CALEDON'S HOUSING PLEDGE TO THE PROVINCE OF ONTARIO (BILL 23)

I am writing to advise that at the Special Town Council meeting held this evening on March 21, 2023, Council adopted a resolution regarding Staff Report 2023-0128: Caledon's Housing Pledge to the Province of Ontario (Bill 23).

The resolution reads as follows:

That Caledon's Housing Pledge to the Province of Ontario ("the Province"), be approved as outlined in Staff Report 2023-0128, and as shown on Schedule B, to demonstrate alignment with the housing target assigned by the Province in conjunction with Bill 23, the More Homes Built Faster Act;

That a copy of Staff Report 2023-0128 be provided to the Minister of Municipal Affairs and Housing; and

That a copy of Staff Report 2023-0128 and attachments be provided to the Region of Peel, the City of Brampton, the City of Mississauga, Metrolinx, the Ministry of Transportation, Ministry of Infrastructure, Peel District School Board, Dufferin-Peel Catholic District School Board, Peel Chapter of the Building Industry and Land Development Association, and the Honorable Sylvia Jones, Deputy Premier, MPP Dufferin-Caledon.

A copy of the Town of Caledon's Housing Pledge accompanied by the Region of Peels Housing Pledge has been enclosed for your reference. For more information regarding this request, please contact me directly by email to mayor@caledon.ca or by phone at 905.584.2272 ext. 4155.

RECOMMENDATION

That Caledon's Housing Pledge to the Province of Ontario ("the Province"), be approved as outlined in Staff Report 2023-0128, and as shown on Schedule B, to demonstrate alignment with the housing target assigned by the Province in conjunction with Bill 23, the *More Homes Built Faster Act*,

That a copy of Staff Report 2023-0128 and attachments be provided to the Minister of Municipal Affairs and Housing; and

That a copy of Staff Report 2023-0128 and attachments be provided to the Region of Peel, the City of Brampton, the City of Mississauga, Metrolinx, the Ministry of Transportation, Ministry of Infrastructure, Peel District School Board, Dufferin-Peel Catholic District School Board, Peel Chapter of the Building Industry and Land Development Association, and the Honorable Sylvia Jones, Deputy Premier, MPP, Dufferin-Caledon.

REPORT HIGHLIGHTS

- In conjunction with Bill 23, the *More Homes Built Faster Act*, 2022, Ontario's Minister of Municipal Affairs and Housing (MMAH) has assigned the Town of Caledon a housing target of 13,000 new homes by 2031.
- This growth is generally aligned with what Caledon planned to deliver in accordance with Regional and Town Official Plans. However, much of Caledon's growth is greenfield, and is contingent on essential infrastructure being in place – roads, transit, utilities and water and wastewater servicing.
- The Province has requested that Caledon sign a 'Housing Pledge' reflecting the target, and explaining the initiatives the Town will undertake to meet the target, as well as the barriers the Town could face in the process.
- The Province has indicated that there will be a connection between the housing pledges and provincial support for housing-enabling infrastructure funding.
- Staff have consulted with Provincial staff, the Region of Peel and School Board staff. The Town participated at the Rural Ontario Municipalities Association (ROMA) and had dialogue with the Minister of Municipal Affairs and Housing, Hon. Steve Clark, which has informed the Housing Pledge.

- Staff have completed a feasibility analysis for the Housing Pledge and recommend signing it as it demonstrates a commitment towards the Province's goal of improving the housing supply systems.
- Caledon's Housing Pledge attached as Schedule B, lists the various initiatives the Town is committed to, how each of these will support housing growth and the risks and considerations the Town is faced with due to the lack of comprehensive planning, infrastructure as well as the disproportionate impact of Bill 23 on the Town's finances.
- The Housing Pledge requests the Province's support in completing comprehensive planning in new growth areas and respecting the way Caledon would like to phase its future growth to create new communities in greenfield areas.
- Town Council endorsed the Housing Pledge at the February 21, 2023 Planning and Development Committee meeting. However, at the subsequent Council meeting on February 28, 2023, Council voted to defer approval of the Housing Pledge to allow the Region of Peel time to put forward Regional requests to the Province as well as give Town staff more time for fine tuning.
- Joint asks for Provincial commitments has been prepared with the Region of Peel, City of Brampton, Town of Caledon and City of Mississauga and have been attached as Schedule C to this report.
- If approved by Council, the updated Housing Pledge and the joint asks will be submitted to the Province by the new extended deadline of March 22, 2023.

DISCUSSION

Purpose of this Report

The report provides an overview of the context and requirements of a Housing Pledge and a draft Housing Pledge for Council's consideration (**Schedule B**). The draft Pledge includes several initiatives, concerns and mitigative solutions that will be required for Caledon to meet its housing target of 13,000 new housing units by 2031.

Background on Bill 23, the *More Homes Built Faster Act*, 2022 ("Bill 23")

Bill 23 received Royal Assent on November 28, 2022 and is part of the Province of Ontario's ("the Province") plan to address housing supply and affordability and follows previous initiatives such as the *More Homes More Choice Act* (2019) and the *More Homes for Everyone Act* (2022). Under the new Bill 23, the Province is looking to address the housing crisis by constructing 1.5 million homes over the next 10 years. To implement this Bill 23 introduces several changes to a total of 10 Acts, including but not limited to, the *Planning Act*, the *Development Charges Act*, the *Ontario Land Tribunal Act* and the *Conservation Authorities Act*. Preliminary analysis shows that the changes proposed through Bill 23 will require significant revisions to the Town's land use planning policies and development processes. These legislative changes will impact the environmental, social, and economic health and wellbeing of the Town.

Housing Target Assigned to Town of Caledon and Housing Pledge

To achieve the housing construction goal noted above, the Province has assigned housing targets for 29 of the largest municipalities in Ontario. The Town of Caledon has been assigned a target of 13,000 new residential units by 2031. The Province has requested that a 'Housing Pledge' committing to this target be approved by Town Council and submitted to the Province by March 22, 2023. (See **Schedule A** for details on the pledge requirements and extension of the original deadline).

The housing targets are adapted from the housing needs assessment provided in the "Ontario's Need for 1.5 Million More Homes" report of August 2022, prepared by Smart Prosperity Institute. The Province expects that the municipalities include details on how the housing development will be enabled or supported through a range of planning, development approvals and infrastructure related initiatives. These housing pledges are not intended to replace current municipal Official Plans and are not expected to impact adopted municipal population or employment projections.

While the municipal housing targets do not specify housing form, density, or geographic location (e.g., greenfield, intensification), it is up to each municipality to determine these details. To develop effective local policies and programs to support the achievement of the housing targets, municipalities will assess their existing and future housing needs through a local lens.

The Province will use the municipal pledges to monitor and track progress towards housing targets. According to the Province, these pledges are in addition to existing, longer-term targets in municipal land use plans and will help kick-start development by highlighting the need for municipal infrastructure, such as roads and sewers.

Municipalities have identified that significant acceleration of transportation, servicing, and community infrastructure as well as additional staffing resources will be required to meet these provincial targets. The Minister has suggested that there will be a connection between the housing pledges and provincial funding support for infrastructure, as well as the release of new growth funding tools. The details of these other levels of support are unknown at this time.

Caledon's growth is primarily greenfield growth, which means that new development will occur on lands currently rural or agricultural in nature. It is critical that key dependencies are identified to enable and support this new growth. This includes, but is not limited to:

- The provision of infrastructure (roads, transit, utilities, and water/wastewater servicing);
- Ensuring that Caledon plans Caledon, focusing growth and prioritizing developments that align with the Town's Growth Management and Phasing Plan;
- The provision of community and emergency services (fire halls, works/operations yards, recreation centres, parks, etc.);
- Securing the Town's financial future;
- Retaining and increasing capacity through staffing or improving development application processes; and
- Continuing to advocate and advance the green agenda.

It is imperative that the Province understand the unique context of Caledon and the disproportionate impact Bill 23 is expected to have on the Town's (and the Region of Peel's) ability to ensure that both hard and soft infrastructure is in place for its new communities.

The housing target proposed is similar to the Region's forecast (a difference of 1,000 units). While staff believe the housing targets assigned to Caledon are achievable, and that the Town will use every initiative and action needed to support the development of new houses, the delivery of these homes is dependent upon a number of external factors including the capacity of the development industry, availability of key infrastructure, comprehensive growth planning, staff resources, etc.

On January 17, 2023, Town staff brought forward a report to Council titled 'Caledon's Initial Action Plan in response to Bill 23, the *More Homes Built Faster Act*, 2022 and Greenbelt Changes' ([Staff Report 2023-0066](#)). One of the 27 action items in response to the Bill is to address the Province's Housing Pledge request. Staff committed to undertaking a preliminary analysis of the number of units which may be achieved, as well as discussions with the Region on infrastructure projects, and sharing those findings with Council. This report is a deliverable of that action item.

Consultation on Bill 23 and the Housing Pledge

Staff have consulted with Provincial staff, the Region of Peel and School Board staff during the feasibility analysis for the pledge.

Provincial staff have advised Town staff to include in its housing pledge all aspects of challenges and creative solutions that Caledon can explore or suggest to the Province to help meet the targets.

The Town participated at the Rural Ontario Municipalities Association (ROMA) and met with Minister Steve Clark to discuss Bill 23 impacts. The Minister confirmed that the Province is still open to feedback on the definitions for affordable or attainable housing under Bill 23. The Minister expressed interest in continuing to receive feedback from stakeholders. The Town committed to continuing to provide feedback and following up on required infrastructure funding.

The Region of Peel, in a staff budget report, has prepared a preliminary analysis of the risks to its capital programs as a result of revenue shortfalls from Bill 23. Multiple projects in Caledon and affecting the Town are included in the at-risk list. The Region is embarking on further analysis of mitigative solutions to infrastructure delivery challenges, and Town staff will work collaboratively with the Region to address impacts to Caledon.

School Board staff have advised on challenges in receiving funding in a timely manner as new greenfield communities develop in Caledon, in securing registration of school blocks when the blocks belong to non-participatory landowners and the need for partnerships with stakeholders including the Town, for joint use and creative development agreements.

The Feasibility of Signing a Housing Pledge for Caledon

Town staff has completed a high-level, preliminary analysis of the existing development applications under review, including the number of units proposed, the status of the applications, the infrastructure required, outstanding critical comments and the manner of which an application would be approved (i.e. Town or Ontario Land Tribunal).

Caledon's housing pledge consists of four components:

1. Units approved that have not applied for Building Permits
2. Active applications under review.
3. Additional Residential Units
4. Units in Bolton 2031 Approved Urban Area and in and around the Bolton MTSA

Staff have identified that with capacity to be gained by increased staffing and efficient development processes and with the in-place planning framework, availability of infrastructure and servicing, the housing pledge can be met. Moreover, with continued comprehensive planning and delivery of all required growth infrastructure from the Province and the Region, including emergency and community services, the Town can achieve and even exceed the total target of 13,000 new units by 2031.

It is worth noting that Caledon has tremendous growth potential in its Settlement Area Boundary Expansion (SABE) which is a total of 4,647 hectares of greenfield land dedication (including 3,061 hectares of community area and 1,565 hectares of employment area). The Town is/has already received inquiries, requests for pre-consultation and application submission. As the Town would like to continue a phased and thoughtful approach to planning for growth, not all applications have been included in the housing pledge as direction is required from the Growth Management and Phasing Plan.

Units Approved That Have Not Applied for Building Permits: 800 Units

The Town has reviewed approved development applications against the number of Building Permits issued for those development applications. As of February 1, 2023, there were 800 building permits which could be issued.

Active Applications Under Review: 6,700 Units

The Town has reviewed the active development applications in process, together with delivery of infrastructure, servicing and their status to identify the number of units which are anticipated to be approved by 2031. Not all current development applications under review are included in this unit count. These units will require servicing and Regional road improvements to Airport Road and Mayfield Road, and include 5% infill growth as directed by the Region's Official Plan.

Additional Residential Units: 1,900 Units

Additional Residential Units (ARU's) include second units, garden suites, etc. in urban residential parcels. The Town has reviewed historical building permit data to identify an average number of ARU's issued annually. Based on this historical data, it is estimated that ARU's will account for approximately 200 units/year.

Units in Bolton 2031 Approved Urban Area and In and Around the Bolton MTSA: 3,600 Units

The Town has also received a number of inquiries, pre-consultation or formal development applications in the above-noted area. The Town has not identified more specific applications or locations for these units, as the location will be determined by the results of our Growth Management and Phasing Plan and ROPA 30.

This report includes a draft Housing Pledge for the consideration of Council (**Schedule B**). It includes the target numbers, highlights key growth initiatives and provides a clear picture of the need for municipal infrastructure, funding and studies, and risks and mitigative solutions, as requested by the Province. If approved by Council, the Housing Pledge will be submitted to the Province by the deadline of March 22, 2023.

Supports Required to Meet Housing Pledge Targets

Caledon is a greenfield (undeveloped land) growth community and requires significant investments to grow and accommodate critically needed housing. Greenfield growth has different requirements than areas which are already largely built out. Those built out areas have benefited from financial tools like Development Charges and Parkland Cash-In-Lieu to grow. Caledon is at the beginning of its growth and will be disproportionately impacted by revenue losses as a result of the changes proposed to these tools under Bill 23.

A recent [Regional report](#) indicates that the housing unit targets included in Bill 23 are substantially higher than the previous levels of growth experienced by the Region, as well as the growth planned in the Provincially approved Region of Peel Official Plan, master servicing plans and the Region's Development Charges Background Study. To achieve the Bill 23 housing unit targets in Peel, additional major water, wastewater and transportation infrastructure will be required beyond what has been planned in the master servicing plans to 2031, and larger infrastructure projects typically take more than 10 years to complete. The current 10-year Capital Plan for Regional infrastructure is \$8.9 billion, whereas the infrastructure required to achieve the new Bill 23 housing targets for Peel's municipalities is estimated to cost approximately \$20.4 billion.

To service growth in the Bolton 2031 Approved Urban Area and in and around the Bolton MTSA, infrastructure investment of approximately \$300 million will be required, which is a fraction of the overall \$20.4 billion identified as above. Given the Region's financial

constraints, Caledon requires a commitment from the Province to help fund the Bolton infrastructure.

Caledon will collaborate with the Region of Peel on its strategy to support municipal housing pledges. To pledge accelerated development by 2031, provision of infrastructure will need to be provided in advance of collecting development-related costs or collecting any new assessment exemptions. In addition, funding shortfalls are expected at the Town level too because of changes to development charges, parkland dedication and the community benefits charges resulting from Bill 23.

Listed below are some essential requests of the Province for Caledon to deliver its housing targets:

- Funding tools for all growth-related infrastructure, public facilities and amenities.
- Respect for Caledon's growth phasing plans and secondary planning processes.
- A stop to Ministerial Zoning Orders (MZOs) so Caledon's pledge is not compromised.
- Restriction on appeals for planning applications that are premature and not supported by the Town.

In addition, the Town of Caledon is recommending a number of other Provincial actions that can support the delivery of housing which are included as asks in the Pledge.

Moreover, at the February 23, 2023 Regional Council meeting, Resolution 2023-130 was passed directing Regional staff to meet with local municipal staff and report back to the March 9, 2023 Regional Council meeting with a list of caveats required for local and regional municipalities to be 'made whole' and to support the pledge process for lower tier municipalities. Caledon staff collaborated with the Region on a joint list of Provincial commitments required from a Region wide perspective to meet the housing pledge targets. This list "Joint Regional and Local Municipal Request for Provincial Commitments to Support Housing Pledges" was approved by Regional Council on March 9, 2023 and is attached to Caledon's Housing Pledge as **Schedule C** of this report.

Financial strategies to address Bill 23 related funding shortfalls for the Region of Peel for the period from 2024 - 2031 are being reviewed by the Region. Caledon will collaborate with the Region on implementation of these and additional strategies to meet the Housing Pledge.

CONCLUSION

Prior to Bill 23 and the Province assigning housing targets, Caledon had begun to plan for a growth of 12,000 new homes by 2031, with a balanced supply of employment, retail, community amenities, parks, essential services and all elements that make up for a healthy and sustainable town. As stated earlier, the Town does not view the new provincial

targets of 13,000 new homes by 2031 as an additional encumbrance, rather as an enhancement and reinforcement of its intended growth trajectory.

Submitting a pledge to the Province demonstrates the Town's commitment to the Province's intent of improving Ontario's housing supply. Moreover, highlighting the key dependencies and shortfalls in the Housing Pledge provides a fulsome picture to the Province and other stakeholders of the types of supports that will be required to meet the targets. Caledon is confident that it can deliver on its share of the housing supply system. However, as staff had reported earlier, Bill 23 itself will make it difficult for Caledon's infrastructure and community services to be delivered in a timely manner and to allow for this growth to materialize, as Bill 23 disproportionately impacts greenfield growth communities with challenging fiscal circumstances. The housing crisis requires a comprehensive approach and the Town is eager to collaborate with the Province and municipal partners on solutions to meet the pledge targets and overcome the substantial challenges imposed by Bill 23.

The Town fully intends on creating complete communities and remains committed to embracing change and innovation as it grows without compromising the values and integrity of its existing and future communities. Caledon's Housing Pledge, therefore, highlights the provincial, regional and other contributions needed to meet its targets, aligned with the vision of Caledon plans for Caledon.

FINANCIAL IMPLICATIONS

Preliminary analysis of Bill 23 as reported by staff to Council in Staff Report 2023-0066 indicates financial implications for the Town as the changes to both DCs and cash in lieu of parkland will create a gap between the cost of growth infrastructure and the Town's ability to fund this infrastructure. Staff anticipates a Town property tax increase of at least 20% or \$414 a year for the average residential taxpayer. Clarity on the applicability of the new definition of 'affordable housing' and new exemptions for 'attainable housing' could exponentially increase the loss projections.

In addition, proposals for responsibilities being downloaded from the Region and Conservation Authorities and the need for amendments to existing policies and programs that were not in current workplans will likely impact staffing/resourcing needs. To date, the Province has not indicated that grant funding will be made available to municipalities to off-set revenue losses and to enable timely delivery of infrastructure needed to meet Provincial housing targets.

The Town is at a critical point in its growth trajectory. A new DC background study is planned for Council approval in 2024 following the completion of several key service plans and other important growth-related work in 2023. Without having this key information completed, the fulsome cost of growth remains unknown. Further, without development

charges available to fund this infrastructure, and without provisions yet to make up for this critical loss, the Town will be faced with difficult financial decisions including increases in property taxes and the reduction in services provided to the community.

In this context, Caledon's Housing Pledge is a demonstrated commitment by the Town towards the Province's housing goal. The Town requests the Province to collaborate with the Town and fully evaluate the financial and other supports and action items listed in the Housing Pledge to support the Town's growth funding sustainability.

**Subject: Municipal Housing Targets and Municipal Housing Pledges
Town of Caledon: 13,000**

Dear Mayor Groves,

I would like to congratulate you on your election in the Town of Caledon last fall. With last year's municipal and provincial elections now behind us, Ontarians are counting on us to work together productively and build a relationship of trust that delivers for the people we represent.

The lack of housing supply has become one of the defining issues in Ontario today, and I know it was just as prevalent in last year's municipal elections as it was for those of us on the provincial level.

Our government is taking bold and transformative action to get 1.5 million homes built by 2031.

That's why, last October, our government introduced our More Homes Built Faster Plan. The plan contains practical measures that will have a real impact on our communities, reduce costs for homebuyers, and encourage the development of more housing supply.

These measures included municipal housing targets and pledges. While municipalities have taken significant steps in increasing the housing supply, our government requires a commitment from our municipal partners to take extra effort in providing housing for future population growth.

To implement the 1.5 million homes target, large and fast-growing municipalities, including yours, are being assigned a **Municipal Housing Target**. Via your municipal Clerk in last October, I asked the Town of Caledon to demonstrate your commitment to accelerating housing supply by developing a **Municipal Housing Pledge** and taking the

necessary steps to facilitate the construction of 13,000 new homes in your community by 2031.

I would like to inform you that the Ministry of Municipal Affairs and Housing is extending the deadline for the submission of municipal housing pledges from March 1, 2023, to March 22, 2023, in response to requests from some of our municipal partners.

As I stated in my previous letter, pledges will provide important information that showcases the strategies and actions that municipalities choose to adopt in order to prioritize and accelerate housing. Our government intends to use your pledges to monitor and track progress so we can continue to play a role in supporting municipalities and removing barriers to housing development. Please see the information sheet attached again to this letter for information and considerations in developing a Municipal Housing Pledge.

We are committed to addressing the policy and implementation barriers you may encounter as you develop your pledges and I encourage you to reach out to Wendy Ren, Executive Lead, Municipal Policy/Program Collaboration, at Wendy.Ren@ontario.ca or 437-995-7094, if you have any questions, comments, or suggestions.

Please acknowledge receipt of the letter to Wendy Ren as well.

I look forward to working together to increase housing supply for all Ontarians.

Sincerely,

Steve Clark
Minister

Encl.

Info Sheet: Considerations in Developing Municipal Housing Pledge

The pledge is not intended to be a land-use planning document, and its development should not require external technical expertise. The format and language used in the pledge should be accessible to the general public. The pledge is intended to be approved by municipal councils and should help codify Council's commitment to meeting their municipal housing target.

Municipalities can leverage new and existing policy tools as they develop housing pledges and work towards their housing targets.

Below is a non-exhaustive list of potential strategies and actions that municipalities may include in developing their housing pledges. There may be additional opportunities based on local circumstances and the Province is interested in hearing about those ideas and creative solutions.

- Strategies to encourage and promote gentle intensification to enable and expedite additional residential units in existing residential areas
- Outline ways in which funding under provincial programs, such as the Streamline Development Approval Fund (SDAF) or Municipal Modernization Program (MMP), has been used to streamline existing municipal development approval processes
- Information on municipal development approval timelines and whether municipalities are being appealed for non-decisions
- Identify potential measures where current lack of infrastructure capacity (e.g., water/wastewater servicing) may limit future housing development
- Strategies to use municipal surplus lands
- Commitment to plan for, fund, and approve (where applicable) specific critical municipal infrastructure to support growth and new housing (e.g., water, wastewater, transit etc.), which may include expanded capacity as well as fully new facilities/assets
- Priorities for strategic and site-specific planning decisions to expedite housing in priority areas (e.g., around transit stations and in transit-served areas)
- Update zoning by-laws to permit a greater range of housing to be built without the need for costly and lengthy rezoning applications
- Municipalities may also consider existing tools such as the Community Infrastructure and Housing Accelerator, [Community Planning Permit System](#), Major Transit Station Areas, and Protected Major Transit Station Areas.

Below are some of the potential components of a municipal housing pledge. Municipalities are free to choose, alter, or add any new components that seem reasonable. Pledges can be represented in the form of plain text, tables, charts, maps, or a combination of them.

- Municipal Housing Target

- Planned and proposed Municipal Initiatives
- Initiative Owner and Additional Stakeholders
- Context and Description of How Initiative Accelerates Housing
- Number of units per initiative and housing type
- Considerations (Barriers, Implementation, Risks, etc.)
- Potential Mitigation Strategies and Proposal to Accelerate Housing
- Potential Reporting and Monitoring Measures

The deadline for municipalities to submit housing pledges to the Minister of Municipal Affairs and Housing is March 1, 2023.

Municipal housing pledges are intended to be public documents and it's anticipated that municipalities will post them online.

Municipalities can contact Ministry staff with any questions and for clarification.

Town of Caledon Housing Pledge

The Town of Caledon commits to the Ontario's Minister of Municipal Affairs and Housing (MMAH) to support the development of the assigned housing target of 13,000 residential units by 2031.

Caledon welcomes responsible growth and wants to make Caledon the most livable and sustainable rural-urban community in Canada.

The Town supports the Province's goal to create a better housing supply system. The Province and Region of Peel have identified Caledon as a major growth area, which is an opportunity to plan complete and well-designed neighbourhoods.

Caledon's Housing Pledge Numbers

The Town of Caledon pledges to support the development of 13,000 new housing units by 2031. The table below indicates how Caledon proposes to meet its housing target.

	Category	Number of New Housing Units Anticipated by 2031
1.	Units approved that have not applied for Building Permits	800
2.	Active applications under review *	6,700
3.	Additional Residential Units (second units, garden suites, etc. in urban residential parcels) **	1,900
4.	Units in Bolton 2031 Approved Urban Area and in and around the Bolton MTSA***	3,600
	Total new housing units	13,000

Figure 1: Town of Caledon's Housing Pledge Numbers

* A portion requires servicing and Regional road improvements to Airport Road and Mayfield Road. Includes 5% of infill growth as directed by the Region.

** Based on an annual forecast of 200 units/year based on recent historical uptake.

*** Requires the Caledon-Vaughan GO Rail Service, reconstruction of King Street and numerous Regional servicing projects (such as: elevated water tank(s), booster pumping stations, sanitary pumping stations, sanitary force mains, watermains).

Figure 1 speaks to infrastructure-related dependencies. In addition, other dependencies impact the Town's ability to achieve the Housing Pledge, including availability of Development Charges (DCs), parkland and other growth-related supports.

Supports Required to Meet Housing Pledge Targets

Caledon is a greenfield (undeveloped land) growth community and requires significant investments to grow and accommodate critically needed housing. Greenfield growth has different requirements than areas which are already largely built out. Those built-out areas have benefited from financial tools like Development Charges and Parkland Cash-In-Lieu to grow. Caledon is at the beginning of its growth and will be disproportionately impacted by the changes proposed to these tools.

Listed below are some essential requests of the Province for Caledon to deliver its housing targets:

- 1. Funding tools for all growth-related infrastructure, public facilities and amenities.**
- 2. Respect for Caledon's growth phasing plans and secondary planning processes.**
- 3. A stop to Ministerial Zoning Orders (MZOs) so Caledon's pledge is not compromised.**
- 4. Restricting appeals on planning applications that are premature and not supported by the Town.**

In addition, the Town of Caledon is recommending a number of Provincial actions that can support the delivery of housing.

Delivering the Housing Pledge

Caledon is at a very interesting juncture in its journey of growth. Historically a low growth community, the Town is set to grow significantly, with most of its growth forecasted to be greenfield (completely undeveloped land). Caledon is preparing itself for growth while balancing pressures to advance current development applications.

The Town has seen a considerable increase in the number of development applications over the last five years, which is expected to continue. Caledon is seeing increasingly complex developments (types of projects, agency involvement, policies and regulations) and Official Plan Amendment applications have more than doubled since 2018. The Town is attracting more infill, mid to high-rise and mixed-use development.

As the Town continues to prepare for and deliver growth in Caledon, provincial and regional support and investments are required.

Key Asks and Action items

The list below outlines key requests and recommended action items to support Caledon's delivery of the Housing Pledge. For context on the action items below, please see later sections in the Pledge.

1. Ask: That the Province ensure that Caledon has access to funding and receives required growth infrastructure investment, including those for parkland and transit.

The Province must address the impacts of Bill 23 related to revenue losses and parkland for the Town of Caledon and ensure the timely delivery of all growth-related infrastructure, including but not limited to municipal services, transit, the Caledon-Vaughan GO rail service and Caledon GO rail station for growth in the Bolton MTSA.

Action 1: Exempt the Town of Caledon, as a greenfield growth community, from Bill 23's new *Planning Act* changes related to parkland dedication and cash-in-lieu provisions.

Action 2: Exempt the Town of Caledon from *Development Charge Act* changes that reduce Caledon's ability to pay for new growth-related infrastructure, new community facilities and amenities, roads and park projects.

Action 3: Repeal Section 59.1 of the *Development Charge Act* to permit developers and municipalities to collaborate on building complete communities.

Action 4: Prioritize and expedite the in-service time of the Caledon-Vaughan GO rail service and the development of Caledon-Vaughan GO station before 2041.

Action 5: Ensure that the planned growth in Caledon is supported by a strong regional higher order transit system that includes bus rapid transit.

Action 6: Ensure that the Region of Peel delivers the required growth infrastructure to the Town of Caledon in a timely manner to support the housing pledge and overall development in Caledon.

Action 7: Acknowledge the inequities stemming from the new definitions of affordable and attainable housing and ensure targeted development charge exemptions for affordable and attainable housing reflect income-based definitions as per the Provincial Policy Statement.

Action 8: Require income-based affordability targets within municipal housing targets to ensure that truly affordable units of various types and tenure are delivered; such as a requirement that all new development include a minimum of 5% deeply affordable housing units, not including additional residential units.

Action 9: Support the Town in accessing any provincial and federal funding streams for housing over the long term, including the Federal Housing Accelerator Fund.

2. Ask: That the Province respect the Town of Caledon's growth management and phasing plans for 2031 and beyond.

Action 10: Support the Town in requiring that Town-led Secondary Planning be completed as per an approved local Growth Management and Phasing Plan.

Action 11: Ensure that once adopted by Town Council, the approval authority (Province/Region) review the Town's new Official Plan and approve it in a timely manner.

Action 12: Support the Town's decisions to refuse privately-initiated development applications for urban land uses outside of current Town of Caledon Settlement Areas and Secondary Plans, in accordance with the Town's Strategic Directions Report endorsed by Caledon Council in 2022, and/or lands significantly encumbered by the GTA West Corridor.

Action 13: Refrain from issuing any further Minister's Zoning Orders (MZOs) in Caledon, which do not have Town Council support through a Council resolution.

Action 14: Where applications for growth are outside of a completed Town-initiated Secondary Plan, enact restrictions on appeals like those found at Sections 22(7.1)-(7.3) of the *Planning Act* for lands outside of settlement boundaries, employment conversions and additional/third dwelling units. Add such restrictions on appeals to Section 34 of the *Planning Act* in respect of zoning and delete in its entirety Section 22(7.4) of the *Planning Act*, which limits the ability of lower tier municipalities to effectively plan.

Action 15: To ensure the timely delivery of development (both residential and non-residential) and considering the amount of greenfield growth within the Town, the Town requests the Province include additional language in the *Planning Act* to require the applicant to demonstrate that the required approvals, engagement and consultation has been completed, in addition to the prescribed information and material being provided. The same appeal mechanisms would apply. Examples of approvals, engagement and consultation would be the lands are within the designated 10-year growth horizon for development in the Town's Official Plan, for proposed urban uses, the lands are located within a Secondary Plan, the lands are zoned for the use proposed, engagement has occurred with the public and consultation has occurred with indigenous communities. The Town also requests that the Province support the Town's Official Plan Amendment to introduce policies in the Town's Official Plan to do the same. Proposed amendments are identified below:

For Official Plan Amendments, insert the language in bold font into the *Planning Act* Section 22(4): A person or public body that requests an amendment to the official plan of a municipality or planning board shall **demonstrate that the required approvals, engagement and consultation has been completed and** provide the prescribed information and material to the Council or planning board.

For Official Plan Amendments, insert the language in bold font into the *Planning Act* Section 22(5): A Council or a planning board may require that a person or public body that requests an amendment to its official plan **shall demonstrate that the required approvals, engagement and consultation has been completed and** provide any other information or material that the Council or planning board considers it may need but only if the official plan contains provisions relating to requirements under this subsection.

For Zoning By-law amendments, insert the language in bold font into the *Planning Act* Section 34(10.1): A person or public body that applies for an amendment to a by-law passed under this section or a predecessor of this section shall **demonstrate that the required approvals, engagement and consultation has been completed and** provide the prescribed information and material to the Council.

For Zoning By-law amendments, insert the language in bold font into the *Planning Act* Section 34(10.2): A council may require that a person or public body that applies for an amendment to a by-law under this section or a predecessor of this section shall **demonstrate that the required approvals, engagement and consultation has been completed and** provide any other information or material that the council considers it may need, but only if the official plan contains provisions relating to requirements under this subsection.

For Site Plan Control, insert the language in bold font into the *Planning Act* Section 41(3.3): If **approvals, engagement, consultation,** information or materials are prescribed for the purposes of this section, an applicant shall **demonstrate that the required approvals, engagement and consultation has been completed and** provide the prescribed information and material to the municipality.

For Site Plan Control, insert the language in bold font into the *Planning Act* Section 41(3.4): A municipality may require that an applicant **demonstrate that the required approvals, engagement and consultation has been completed and** provide any other information or material that the municipality considers it may need, but only if the official plan contains provisions relating to requirements under this subsection.

Action 16: Ensure that the provincial facilitator(s) respect Caledon's greenfield growth context while undertaking Regional governance reviews.

Moreover, the Town is proposing the following provincial actions to further support Caledon-specific and/or Province-wide housing targets. Additionally, joint asks to the Province from the Region of Peel, Town of Caledon, City of Brampton and City of Mississauga are attached to Caledon's Housing Pledge.

3. Ask: That the Province amend the *Planning Act* and environmental approval processes to advance additional development review efficiencies.

Action 17: Where development applications are required to be circulated to provincial ministries (i.e. Ministry of Transportation), the Province is requested to address the significant delays in receiving comments that often exceed processing timelines in the *Planning Act*, and contribute to the Town's inability to process applications within the timelines in the *Planning Act* related to appeals and fee refunds. The Town requests comments from provincial ministries in a timely manner as follows:

- For Preliminary (PARC) Meetings, Site Plan Control and Part Lot Control: No later than 10 business days.
- For Pre-Consultation (DART) Review and all other development applications: No later than 20 business days.

Action 18: Building upon recent amendments to the Municipal Class Environmental Assessment (EA) as part of the Ministry's work on EA modernization, the Province should consider implementing a streamlined environmental approval process similar to a Transit Environmental Assessment for growth-related projects associated with the Housing Pledge lands.

Action 19: Confirm that the ability for the municipality to amend conditions of draft approval and utilize the same provisions and Regulations of the *Planning Act* used for draft plan extensions are equally applicable to reinstatement of draft plans as it relates to conditions, notice and appeal mechanisms. The Town has leveraged Section 51(33.1) of the *Planning Act* to essentially re-instate a lapsed draft plan approval and confirmation and support from the Province that all the section 51 subdivision provisions and associated Regulations continue to apply would provide clarity on the details surrounding this tool and would benefit municipalities across Ontario.

Action 20: Delegate minor variances to municipal staff for setbacks, building heights, building area and parking spaces, provided that the requested variances are a 30% or less variance to the applicable zone standards, to speed up development approvals processes and reduce the need for Committee of Adjustment applications. In reviewing all Minor Variances submitted to the Town in 2022:

- Should the Provincial changes with respect to additional residential units have been in place prior to 2022, the Town would not have required 8 minor variances, increasing the timing on delivery of those units.
- With the changes proposed above for delegation, the Town would not have required more than 25 variances, again reducing the timing of delivery of development.

4. Ask: That the Province explore additional actions to further housing targets.

Action 21: Refrain from supporting removal and/or re-designation of lands within the Greenbelt in the Town. Caledon has ample land within its existing and future settlement area boundaries to accommodate growth.

Action 22: Explore opportunities to encourage builders to construct housing units once approved by the Town. Through conversations with the building industry,

community builders are indicating that the timing and release of units are affected by the market and other matters. There are chances of delayed release of new housing units for sale by Caledon developers due to the current housing market. The Province should support the Town in placing lapsing provisions, removal of servicing allocation, etc. for not constructing approved housing units within a reasonable period.

Action 23: Consider permissions for additional residential units and planning for required infrastructure support in more rural areas of Caledon and the Oak Ridges Moraine Conservation Plan Area where the environment would support those units and the Ontario Building Code can be met. For example, where a primary dwelling is permitted in the Oak Ridges Moraine Conservation Plan Area, permissions for additional residential units may be accommodated while still meeting the intent of the plan, provided that the policies of the Plan are conformed to and that the Ontario Building Code is met.

Action 24: Support additional funding under the Municipal Modernization Program, including the newly announced funding for rural communities.

Action 25: Provide tools to allow the Town to continue to rely on Conservation Authorities (CA) expertise when evaluating development impacts and mitigation strategies. Also allow greenfield growth municipalities to leverage the expertise of CAs through Service Level Agreements to ensure the timely delivery of housing.

Action 26: Allow greenfield growth municipalities to use Development Charges to fund Service Plans, secondary plan and other growth-related studies including sub-watershed studies that identify, protect and manage environmental areas, plan complete communities, and facilitate quicker development approvals.

Action 27: Release all outstanding regulations which have been impacted by Bill 109 and Bill 23 as soon as possible, and consider the timing and impacts of future bills, reducing the state of the 'unknown' and allowing the Town to focus on delivering housing units rather than responding to changing legislation.

Action 28: Expedite the work on amalgamation of the Provincial Planning Statement and the Growth Plan considering the substantial conformity impacts on Caledon's and other municipalities' ongoing Official Plan update projects and ensure transitioning of previous municipal comprehensive reviews and/or additional time for municipalities to complete Official Plan reviews to achieve Provincial Plan conformity.

Action 29: Explore opportunities to improve the timing and method of school funding to enhance the ability for public services facilities to be co-located in community hubs, promoting cost-effectiveness and improving service delivery, to support Section 3.2.8.1 of the Growth Plan.

Potential Reporting and Monitoring Measures

The Town will share the Housing Pledge on the public website and bring forward an annual monitoring report to Council.

Caledon Getting Ready for Growth

The Town's key growth-related accomplishments include:

- Advancing the new Official Plan Review with a made-in-Caledon Growth Concept to 2051 and embarking on a comprehensive Growth Management and Phasing Plan and Fiscal Assessment.
- Creating hundreds of full-time jobs in Caledon by supporting major industrial projects such as Mars Canada, Beer Store, UPS and Amazon.
- Increasing high speed internet access to residents by installing 106km of fibre optic cable through Caledon-Vianet and SWIFT partnerships.
- Completing a Parks and Recreation Strategic Plan and updating the Parkland Dedication By-law.
- Completing the Caledon Transit Feasibility Study and Caledon Multi-Modal Transportation Service Plan and initiating local public transit service for Mayfield West and Bolton.
- Completing an active Transportation Service Plan, acquiring the OBRY Rail to Trail Corridor and developing a draft rail to trail implementation plan.
- Expanding the Caledon East Community Complex to respond to emerging needs over a 15-year span.
- Setting net zero emissions target with the adoption of the Resilient Caledon Community Climate Action Plan.
- Preparing an initial business case for the Caledon Vaughan Go Rail, which supported the inclusion of the service in the Greater Golden Horseshoe Transportation Plan.
- Implementing an Economic Development Strategy including the Downtown Bolton Revitalization and Bolton Community Improvement Plan.

The Town is currently preparing a new 12-year Strategic Plan that will outline new priority areas and inform multi-year business plans and future budget cycles.

Growth Investments in Caledon

KEY GROWTH INVESTMENTS

Caledon is poised for significant growth. The Town has been diligently planning to support and advance growth in a timely manner. The following items are critical to achieving the new housing targets and the Town is committed to these enhancements and others as needed. **The Province should help the Town mitigate the risks to delivering the pledge.**

Modernization of the Development Review and Approvals Processes (ongoing)

Caledon acknowledges the role of efficient development review processes in the housing supply timelines. In recent years, Caledon has embraced opportunities to improve service delivery with a focus on service excellence, including the introduction to Lean methodology and utilizing Modernization Funds available from the Province. The Town has been investing in improvements to technology, such as electronic review software and electronic processing of applications.

Details of Caledon's efforts to streamline the approvals processes and positively impact development are outlined in a February 21, 2023 Staff Memorandum to Council (Update on Bill 109 Action Items). Utilizing the changes presented by Bill 109, Caledon has updated all avenues of the pre-consultation process to provide more guidance, preliminary comments and feedback, scope and terms of reference for submission materials. Planning has received delegated authority for those items available under the *Planning Act* to be delegated and has leveraged Bill 109 to re-instate draft approval on a lapsed draft plan of subdivision.

The Town continues to improve its efficiencies and it received provincial funding under the second intake of the Province's Municipal Modernization Program including \$292,500 towards Town of Caledon Planning and Development Services Folders Enhancement. The project is continuing into Spring 2023 and has an estimated annual savings of \$330,000.

The Town has retained Dillon Consulting to undertake an end-to-end review of the Site Plan and Subdivision development application processes using Lean methodology. The purpose of this review is to streamline, gain efficiency, update technology and ultimately

create community-focused development application processes that improve municipal development processing times and create a seamless service delivery to all land development related matters within the Town. The new processes will ensure Caledon is able to proactively plan its community.

CONSIDERATIONS

While the Town is committed to making significant improvements to development processes, there are some issues to consider that will impact the Town's ability to meet the assigned housing target:

- Availability of technology vendors to make the necessary improvements in a timely manner once the streamlining review is complete will be critical for delivery on the efficiencies.
- To make the necessary improvements, staff time is required to contribute to and make the improvements to the processes; at the same time as continuing to process applications that are in the system and adapt to further changing to planning legislation. This may create delays in the short term due to these competing priorities for our limited resources.
- The Town has a significant number of environmental policy areas within Greenfield growth areas that requires the expertise of a range of technical disciplines to appropriately evaluate and facilitate development. The Town currently relies on partner CAs to provide this expertise. Under Bill 23, without the proper support from CAs, the Town risks slowing down the process of development approvals and incurring added risk to the municipality and costs to the developer.
- Staff resources are consumed by learning and reacting to changing provincial legislation and not fully focused on processing development applications. Proposals for responsibilities being downloaded from the Region and the need for amendments to existing policies and programs that were not in current workplans are impacting staffing/resourcing needs. With changing legislation and uncertainties associated with release of pending sections of Bill 23, it is critical that the Town's roles and any increased responsibilities resulting from Bill 23 be clarified so that the Town can prepare a staffing strategy. Otherwise, there may be unintended consequences on development approval efficiencies.

Growth Management and Phasing Plan and Fiscal Impact Study (ongoing)

Caledon Council endorsed a plan for [Strategic Growth Direction for the Town of Caledon](#) and a “made in Caledon” Growth Concept to 2051. This will inform the Town’s urban structure and identify directions for housing density and form in each key growth area. To provide clear guidance and direction on where, when, and how to grow, the Town has started work on a Growth Management and Phasing Plan, including a Fiscal Impact Study. This important work is a critical step to advance strategic, cohesive and fiscally responsible growth. This Plan will:

- establish criteria to evaluate and prioritize areas for growth, leveraging the policy framework of the Town’s draft Official Plan, Peel’s Official Plan, Caledon’s Growth Concept, and prepare proposed phasing policies;
- consider and provide recommendations on infrastructure capacity (i.e. water, wastewater), transportation networks, public transit, and community supportive infrastructure needs;
- include a Fiscal Impact Study and consider the Town’s evolving tax base and financial obligations/requirements/state; and,
- consider appropriate community and employment lands phasing to 2051 within Caledon, to provide a phasing plan with clear direction on where and how to grow to the 2051 planning horizon.

The project team includes Watson and Associates for project management and the Financial Impact Analysis, HDR for transportation planning GM Blue Plan for municipal servicing, and Meridian Planning for planning.

The new Official Plan will incorporate policies identified in the Growth Management and Phasing Plan.

CONSIDERATIONS

- The Town is receiving proposed development applications for areas outside of the Town’s existing Settlement Areas and Secondary Plan Areas in advance of the Growth Management and Phasing Plan, including privately initiated secondary plans. In some cases, these applications are not within a reasonable servicing timeframe, are located within and/or adjacent to the proposed GTA West Corridor and may not consider community services such as parks, fire halls, recreation centres, etc. Reviewing and processing these fragmented applications results in delays and challenges to areas where the Town can deliver housing units in a timely manner with the required infrastructure and community services being readily available.
- In addition to the growth identified in the Housing Pledge, Caledon will continue to grow in accordance with our Growth Management and Phasing Plan. This growth will need to be supported by additional infrastructure not identified in this Pledge. This will likely require new approaches to financing and delivering infrastructure,

including front end financing, and developer-led design build solutions, including for community facilities such as parks.

- The Regional Phasing Directions for the 2051 New Urban Area is currently anticipated to be completed in 2023 with the Town's Growth Management and Phasing Plan to follow. The updating of the Region's front-ending policy is also currently underway. This may result in changes to and additional infrastructure needs for the Town of Caledon.

Official Plan Review (ongoing)

The Town of Caledon is creating a new Official Plan (OP) 'Future Caledon – a road map for the next 30+ years', which will guide development, housing, transportation, employment, community facilities and more. While the Housing Pledge does not require details on housing types, tenure, form, affordability or densities, the OP will establish policies that advance an appropriate range of housing types, infill and intensification opportunities based on the needs of Caledon, growth direction and urban structure.

Due to the age of the Town's current OP, policies related to development, housing types, infill and intensification are outdated. With the approval of a new OP, detailed housing targets based on tenure and affordability can be considered, to support the availability of housing that is needed locally. The new OP will also speed up the development application review as less OP amendments will be required to facilitate development. It is critical that the Town completes this OP Review and that it is approved by the Ministry/Region in a timely manner.

On November 4, 2022, the Region of Peel Official Plan (RPOP) was approved by the Ministry with 44 modifications. The modifications included changes to the Town's

Settlement Area Boundary Expansion (SABE) area, which are now closer in line with the Council endorsed Caledon's Growth Concept, submitted to the Minister for consideration in the approval of the RPOP. Town staff are reviewing these changes and their impacts on the draft documents. Town Council approved moving the final adoption of Caledon's OP to fall 2023.

Under Bill 23, the recently approved RPOP will become an enforced OP for Caledon in addition to Caledon's OP until the Town revokes or amends it. Also, the Minister of Municipal Affairs and Housing may be the approval authority for Caledon's OP, depending on when land use planning responsibilities are removed from the Region of Peel, requiring staff to engage the Province about the OP Review process.

CONSIDERATIONS

- The Town is concerned with the timing of final Official Plan adoption considering the uncertainties around various provincial initiatives.
 - Under Bill 23, the proposed removal of planning policy and review function responsibilities of the Region of Peel to address growth at the regional level may result in conflicting planning policies and a lack of coordination of regional transportation, water and wastewater infrastructure. On December 8, 2022, Bill 39, Better Municipal Governance Act, 2022 received royal assent. While not expressly included in the proposed legislation, the Province has announced that a provincially appointed facilitator will be asked to assess regional government and determine the appropriate roles and responsibilities for each of the Region and its local municipalities. Caledon anticipates that these discussions may help mitigate some of the negative land use planning and infrastructure coordination impacts of Bill 23, however the timelines associated are unknown.
 - The Province is also integrating two major provincial growth documents into one instrument, to align with Bill 23 housing goals, A Place to Grow: Growth Plan for the Greater Golden Horseshoe and the Provincial Policy Statement. Key changes are expected for long-term population and employment forecasts, residential intensification targets, minimum densities, rural housing, etc., all of these are expected to have an impact on Caledon's Official Plan review.

Secondary Planning and Bolton and Mayfield West Major Transit Station Area Planning (ongoing)

The new Region of Peel Official Plan requires that all greenfield areas (undeveloped areas) currently outside of the existing Settlement Area Boundary Expansion (SABE) Areas be implemented through secondary plans. Building on Regional direction and Town Council direction, the Town's new draft Official Plan will require Secondary Plans be Town-led. The Town will identify priority secondary plans to accelerate housing and community building and is making substantial investments in Service Plans and background studies. Prioritization may rely on criteria such as integration with town-wide networks, completing areas of previously approved or actively developing communities and leveraging capital investments already made.

Caledon will consolidate the six (6) existing Bolton Secondary Plans and create one comprehensive, modern plan; and create new Secondary Plans and studies to guide the additional growth directed to Bolton. The Town, with assistance from external consultants, has prepared a 'Framework Plan' to guide growth and future secondary plans in Bolton. The Plan provides land use guidance and minimum densities for Bolton; however, the Town recognizes the need for flexibility to provide opportunities for innovation through future planning applications, and to implement recommendations and policies from supporting secondary plan studies.

Moreover, the Town's Major Transit Station Area (MTSA) planning will help unlock higher density housing and transit-oriented community development in a thoughtful and fiscally responsible manner. Caledon and Peel have also identified a planned major transit station area in Mayfield West, but it still has not been identified by the Region as a Primary MTSA. The Town is embarking upon an MTSA study, which will provide guidance for establishing and implementing the required *Planning Act* Protected MTSA policies for the Bolton MTSA and overall policy guidance for the Mayfield West MTSA.

CONSIDERATIONS

- Since 2019, the Town has and continues to receive more privately-led Official Plan Amendments for site-specific development or secondary plans. Development pressures have also led to an increase in requests for Ministerial Zoning Orders (MZOs). Caledon's SABE is designed to accommodate growth projected to 2051 and without growth phasing studies and secondary planning in place, the growth will happen sporadically and adversely impact good community planning.
- Under the current *Planning Act*, the Town struggles to focus its resources on areas most likely to deliver the fastest and most cost-effective housing, in accordance with its upcoming growth phasing plan. Caledon will benefit from legislative changes that support refusals of ill-timed applications in areas where growth is not generally considered within the 2031 Housing Pledge and broader Growth Management and Phasing Study.
- Lands that are not considered for growth within the 2031 Housing Pledge planning horizon should not be able to be deemed "complete" applications, unless otherwise identified in the Growth Management and Phasing Plan. In addition, the

establishment of urban uses in these applications can take critical resources away from the review and approval of applications on lands that are urgently needed now to fulfill the Town's Housing Pledge. Instead, it may divert those critical resources to lengthy, expensive and time-consuming OLT appeals for projects that are outside the 10 year horizon of the Housing Pledge target areas.

Caledon-Vaughan GO Rail Service (planned)

Improved transit service is important for long-term growth and for healthy and livable communities in Caledon. Rail service, in addition to new connections for passenger vehicles, will provide a variety of convenient transportation options that support the needs of our residents. In 2022, the Town completed an initial business case and worked with the Province and Metrolinx to include the Caledon-Vaughan Go Rail service in the Greater Golden Horseshoe Transportation Plan (GGHTP).

The Town is undertaking a Major Transit Station Area (MTSA) Study to put policies in place for a higher density transit-oriented community in proximity to the Caledon GO Station to be developed before 2041. The identified MTSA is the area generally within a 500 to 800 metre radius of a transit station, representing about a 10-minute walk. Timely availability of this GO service can accelerate the supply of investment and housing and help the Town reach and exceed the 13,000 housing unit target within the required time frame. It can also allow the Town to adjust additional densities in the Caledon GO MTSA from future growth areas that may not be able to receive new servicing due to infrastructure funding constraints stemming from Bill 23. The Town is also looking at leveraging investments into the Caledon-Vaughan GO line to encourage the revitalization of the Bolton South Hill area.

CONSIDERATIONS

- The Town requests that the Province prioritize and expedite the in-service time of the Caledon-Vaughan GO rail service before 2041. A delayed delivery will not align with the optimal land use and built form that the Town may need in the MTSA, in time for the housing pledge targets. In conjunction with the availability of the GO service, the Town will explore the establishment of the first and last mile

connections through local and micro transit and active transportation. Planning and investment with funding supports will be key to the success of the GO.

Zoning By-law Review and Community Planning Permit System (planned)

The Town is embarking on a review of the Zoning By-law to align with the new Official Plan, leveraging smart and simplified zoning approaches to maximize housing supply and housing options. These may include expanding housing typologies, targeting more areas for medium or higher densities, addressing under-utilized parcels and public lands. A parking standards review will be a part of the overall Zoning By-law review and innovative parking regulations can also contribute towards easing construction of new housing.

The Town is also exploring the feasibility of a Community Planning Permit System in key areas around the Town. A CPPS combines zoning, site plan and minor variance processes into one application and approval process with shorter approval timelines and can support faster approvals for new housing.

CONSIDERATIONS

- The Town will aim to establish supportive zoning, however, the market uptake is dependent on many factors including transit improvements and availability of infrastructure.

A Gentle Density Strategy (planned)

Gentle density in existing and new neighbourhoods includes addition of additional residential units (such as basement units, garden suites, loft suites, garage conversions, duplexes, triplexes, etc.). In response to Bill 23, staff will prepare a strategy to address gentle density including the *Planning Act* changes related to additional residential units; and initiate amendments to the Town's Official Plan, Zoning By-law, Development Charges By-law, Parkland Conveyance By-law, Site Plan Control By-law, the Fill/Site Alteration By-law(s), as well as various development processes. To assist the community with these changes, staff has already initiated a webpage outlining the changes to provide greater clarity. A plan to increase the legalization of existing second units will also be prepared.

Staff analysis shows that within existing built-up areas of Caledon, the permission for as-of-right additional housing units created through Bill 23, will apply to between 15,000 and 18,000 residential properties (subject to further analysis) with both piped water and wastewater services in the communities of Caledon East, Bolton, Mayfield West, Mono Road and Inglewood.

There is interest from some developers in Caledon about incorporating additional residential units in new planned communities. Staff will evaluate all ongoing and new development proposals for design strategies and proactive inclusion of a certain percentage of legal additional residential units. This will support increased housing affordability and help Caledon meet growth targets while optimizing the use of infrastructure.

There is also an expressed interest in residents and developers in Caledon to incorporate additional residential units in areas without full municipal services. Staff encourage the Province to consider additional units in more rural areas and the Oak Ridges Moraine where the environment would support those units and the Ontario Building Code can be met.

The Town will also explore a town-wide on-street parking study for parking management that is required due to uptake in additional residential units. Considering that the Town has very limited transit options, ensuring that there is sufficient parking is a reality and a major consideration in additional residential units. Should the Town receive support in advancing transit options with the Town, there will be more transportation options available to our residents, with less reliance on parking spaces. The outcomes of this study will assist with an update to the parking standards in the Zoning By-law.

CONSIDERATIONS

- It is challenging to predict market uptake in additional residential units in Caledon for the purpose of the Housing Pledge. The Town does expect that the uptake will increase over time as the community matures and if the lack of affordability persists.
- Infrastructure capacity analysis in existing neighbourhoods may reveal insufficient servicing requiring costly upgrades, or the need for community amenities or traffic

and parking management plans to accommodate additional density, especially with limited public transit available in Caledon.

- The gentle density strategy will need to reflect local services and infrastructure (e.g. sanitary sewer and water capacity) and other community needs (e.g. transit, schools, libraries, licensed child care)
- The Town will explore a collaborative project with the Region of Peel and other partners on an infrastructure capacity analysis of the five neighbourhoods and determine the need and cost of infrastructure upgrades that may be required, which may potentially lead to funding shortfalls.

Caledon's Community Builders Roundtable (ongoing)

Meeting growth projections and housing targets in the current challenging fiscal environment will need an extremely collaborative approach and buy-in from multiple stakeholders. The Town will leverage Caledon's Community Builders Roundtable to collaborate with developers and landowners, including in the SABE, so that all stakeholders can contribute to the growth targets in a meaningful way.

The Roundtable operates under the four principles of: Caledon Plans for Caledon, Alignment with Legislation and Policy, Fiscal Sustainability and Growth Infrastructure. The Roundtable will support Caledon's growth targets by providing insight into policies, financial and non-financial tools necessary for the effective implementation of growth objectives; as well as share innovative approaches to support the Town's sustainable future.

Region of Peel Capital Projects (ongoing and planned)

Municipal sanitary and water services in Caledon are administered by the Region of Peel. A Regional staff report dated December 8, 2022 identified that Bill 23 will greatly reduce the Region's ability to collect Regional Development Charges with an estimated impact of around \$2 billion over the next 10 years and \$6 billion if the Province's housing targets are actually met. Due to this loss in revenues, the Region will not be able to provide infrastructure in a timely manner to support the housing targets set by the Province for Peel municipalities.

If there is no other provincial or innovative funding to cover these revenue shortfalls, the financial burden of making up the losses would shift to property taxes and utility user

fees. The Region calculates that the annual average increase to the regional portion of the Tax/Utility Bill – Residential will be \$145 to \$180 per household.

CONSIDERATIONS

- Caledon's growth is currently challenged because of lack of infrastructure. The Cities of Mississauga and Brampton have been assigned housing targets that are significantly higher than the Region of Peel's forecast. The Region will have limited financial and service capacity to design, procure, build and maintain infrastructure at this pace and scale. With competing demands from Mississauga and Brampton, the lack of a solution for transit, roads, utilities and servicing has and will continue to be a barrier to growth. If the Region cannot deliver on its infrastructure plans for Caledon, such as water and wastewater servicing, the Town will not meet the housing targets.
- Bill 23 related uncertainties could also affect the timing of the Region's 2041 Water and Wastewater Service Plan and updates to it, as well as the completion of the 2051 Transportation Service Plan. These delays will affect Caledon's delivery of the housing targets.
- Region of Peel staff have reported on a preliminary assessment of Bill 23 related risks to the Region's Capital Plan. Key Regional capital projects at risk based on funding were identified and include the following projects within or impacting Caledon's growth planning:

Project #	Project Description	Status
17-2280	Albion-Vaughan Road Trunk Sewer Sanitary sewer	Under Construction
15-2153	Kennedy Road Sanitary Sewer	Under Construction
10-1210	Pressure Zone 6 Transmission Watermain	Under Construction
24-1270	West Caledon Transmission Watermain & Elevated Tank	Future Project at risk
13-4055	Mayfield Road – Hurontario Street to Chinguacousy Road (Mayfield West)	Approved and Tender
11-4080	Mayfield Road – Coleraine Drive to Hwy 50	Future Project at risk
17-4030	Mayfield Road – Mississauga Rd to Winston Churchill Blvd	Future Project at risk
21-4030	Mayfield Road – Heart Lake Road to Hurontario Street	Future Project at risk
15-4070	Mayfield Road – Chinguacousy Rd to Mississauga Rd	Future Project at risk

Figure 2: Potential At-risk Regional Capital Projects Impacting Caledon

It is important to note that the Region's risk calculation is based on the current capital plan and does not include the Region's new Official Plan, nor does it reflect any revisions to the capital plan required to meet the new housing targets set out by the Province. The actual risk calculations could be exponentially higher.

Specific to the Housing Pledge targets in Figure 1, Caledon will require the timely completion of Regional road improvements to Airport Road and Mayfield Road, the reconstruction of King Street, and Regional water and wastewater servicing projects related to the planned development in the Bolton 2031 Approved Urban Area and in and around the Bolton MTSA.

The Caledon-Vaughan GO Rail Service will unlock significant growth in Caledon. Its success is contingent upon a series of investments and include the following projects:

- new water and wastewater trunk mains on Humber Station Road from Mayfield Road to King Street;
- new Pressure District 7 Booster Station at King Street and Emil Kolb Parkway, and water and wastewater infrastructure on King Street, Emil Kolb Parkway, Highway 50 and Coleraine Drive;
- new Pressure District 7 elevated water tank; and,
- new Wastewater Pumping Station and associated force main on Emil Kolb Parkway.

In addition, other infrastructure will be required to service lands identified in the upcoming Growth Management and Phasing Plan.

A [Regional report](#) on infrastructure planning and requests of the Province to support Bill 23 housing targets outlines opportunities to build more homes faster while also acknowledging the challenges associated with advancing infrastructure construction to accommodate accelerated growth. The Region has indicated that work is under way to finalize an approach to address growth forecasts in relation to Bill 23. The Region's use of tools to accelerate significant infrastructure investments may be required to advance key development projects in Caledon. These tools could include front-end financing and developer design/build arrangements.

Town of Caledon Capital Projects (ongoing and planned)

Bill 23 focuses on housing. But residential growth in greenfield context will require a concurrent supply of employment and jobs, retail, food services, community amenities, libraries, fire halls, health care, social services, and schools in order to create complete communities. Growth funding shortfalls may impact the provision of soft infrastructure and cause delays in the Town's economic development goals. The shortfalls will result in housing being constructed without supporting community services such as fire stations, community centres, schools, etc., impacting all Town residents (new and existing).

An essential part of Caledon's future planning is to fund the required infrastructure.

As a greenfield development area, where the Town is building communities from scratch, much of the infrastructure needed to build out the communities does not exist and is just beginning to be planned or constructed. The Town's 2019 Development Charges (DC) Background Study identifies a needed investment of \$626 million for capital projects over a 10-year period to be funded from DCs. In addition, the Town has not been able to build substantial reserves to support this infrastructure investment nor is its tax base strong enough to support any additional burden from transferring these costs to property tax funding. As such, funding is required to support this type of development in Caledon if DC revenues are not sufficient.

The Town's 2019 DC Background Study (which underestimated the growth Caledon faces) identified \$390 million worth of DC funding needed to support just its Roads Program. At this time, without an updated DC Background Study, estimating the DC funding for all aspects of growth is difficult. Once this work is completed over the next couple years, this number will be significantly higher.

The Town is currently undertaking an update of all infrastructure servicing plans to support growth to 2051 and is to embark on a comprehensive update to its DC Background Study and By-law this year (to be finalized by 2024). Ongoing studies include:

- Multi-year Capital Plan
- Comprehensive Plan - Parks and Recreation

- Comprehensive Plan – Library
- Comprehensive Plan – Provincial Offences Courts
- Service Plan – Operations
- Active Transportation Service Plan
- Multi-Modal Transportation Service Plan
- Transit Service Strategy
- District Energy Feasibility Study
- Service Plan- Storm Water Management
- Location Study – OPP
- Comprehensive Plan- Economic Development
- Comprehensive Plan - Culture
- Comprehensive Plan - Tourism Development

These plans are expected to be complete in 2023-2024 and will lead to the identification of future capital projects and required funding.

Impacts of Bill 23 on growth funding

Caledon and the Region of Peel will face some of the largest funding challenges to deliver the housing infrastructure needed to meet the Province's own Growth Plan targets and the Town's forecasts due to the inequities resulting from applying Bill 23 definitions and exemptions for affordable and attainable housing. The definitions will lead to high end market housing being now considered affordable and being subsidized by taxpayers. This as well as other DC exemptions will be catastrophic to the Town's DC and parkland revenues, leading to a huge challenge to not just its future growth, but to the maintenance of its current service levels.

Bill 23 does not currently specify whether affordability will be calculated against the aggregate average annual housing value across all dwelling types or the average annual value within each dwelling type. The Town's early estimate of the DC losses under Bill 23 assumes the latter interpretation (which leads to an estimated 20 per cent of total units being considered affordable).

If future legislation establishes that affordability is calculated against an aggregate value across all dwelling types, then the percentage of affordable dwellings will dramatically increase (Region of Peel estimate for Caledon for 2021 resulted in 56 per cent of units considered affordable under Bill 23), leading to an equally dramatic loss of DC revenue- almost three times that of the projected \$85 million. Whereas according to the Provincial Policy Statement definition of affordable housing, 16 per cent of the total housing supply would have been considered affordable.

The Town's 2019 DC Background Study (which underestimated the growth Caledon faces) identified \$390 million worth of DC funding needed to support just its Roads Program. In applying the calculations noted above, for the Roads Program only, this would mean that:

- Where affordability is measured using an average annual value within each dwelling type, the Town increase to taxes would be:
- Where affordability is measured using an aggregate average annual housing value across all dwelling types, the Town would need an increase of XXXX per single detached dwelling

Because key provisions of the DC Act proposals are unclear, this could lead to unintended outcomes. For example, the Bill 23 DC exemption for affordable residential units applies when the unit price is no greater than 80 per cent of the “average purchase price”. If the average purchase price includes resales as well as new unit sales, then the scope of the exemption is very broad.

The new definition of affordable housing under Bill 23 may lead to an affordable housing price that is almost double what the Town currently defines as affordable using the income-based PPS approach.

The Bill 23 definition does not reflect the true affordability challenges in the Town for low and medium-income households, creates inequities and subsidizes high end-market housing. The definition provides the illusion that affordable housing exists and is provided by the market, when, in reality, even 80% of average sale price would not be truly affordable.

The affordable thresholds imposed by Bill 23 are not realistic and lead to market housing being now considered to be affordable. Applying the affordability rate based on Bill 23, in 2021, ownership housing in Caledon would have been considered affordable if it had been priced at \$1,170,229 for a dwelling, which would have correlated with the purchasing capacity of highest income households in Caledon (Income Decile 9 and 10). In 2021, Using the PPS's income-based approach the price at which housing would have been considered affordable is \$610,370, aligning with the low- and medium-income household (Income Deciles 1-6) capacity to purchase or rent housing. The ‘affordability gap’ between the two definitions (PPS and Bill 23 across typologies) is \$559,859.

The upcoming exemptions for the newly defined ‘attainable housing’ lead to even further DC losses and considerably impact Caledon's growth planning and infrastructure funding.

Combined with the Bill 23 related DC and parkland impacts, to maintain funding for the Town's current growth-related infrastructure plans, a Town property tax increase of at least 20% or \$414 a year for the average residential taxpayer is anticipated. It should be noted that in addition to this increase, the Region calculates that the annual average

increase to the regional portion of the Tax/ Utility Bill – Residential will be \$145 to \$180 per household).

CONSIDERATIONS

- There are crucial projects not considered in the 2019 DC Background Study which need to be included in the next update, being prepared in 2023 for approval in Q2-2024. While the full cost of growth cannot be calculated accurately now, the Town is certain that Bill 23 will significantly impact Caledon's finances and may jeopardize future capital projects. It is essential that the Province make efforts to make Caledon whole for funding its growth-related projects and provide new funding tools.

Municipal infrastructure maintenance services (operations) also need to be considered. The Town is currently at capacity with its operations facilities and cannot accommodate additional maintenance of parks, trails, road and stormwater infrastructure without acquiring more land and building new operational facilities. The Town has a strategy for future operation facilities to maintain growth in infrastructure but it would rely on DC funding to implement that strategy.

Employment and Economic Development (ongoing)

The Town's employment forecast for 2031 is 52,000, which is an increase of 20,000 from the 2021 numbers. The required infrastructure needs to be in place to deliver this employment by 2031 - to achieve balanced growth and ensure the Town provides local jobs. Caledon will require similar commitments for servicing from the Region for employment lands

Caledon is well-positioned to capitalize on the strong pattern of growth that is predicted for the regional economy particularly as it relates to the growth in its target sectors including: advanced manufacturing, agriculture (including value-added agri-business), tourism (including arts and culture), and elements of the knowledge-based and creative class economy. 'Caledon 2020-2030 – An Economic Development Strategy for the Town of Caledon' lists key priorities and objectives that include: growth in the non-residential tax assessment, an increase in the amount of gross floor area built out for commercial and industrial use, and growth in local employment (number of residents working in Caledon and by type of sector). The Strategy advocates for the development

of, and investment in, the Town's urban and village cores, enabling opportunities for higher density residential, mixed-use and office style development, co-working spaces, destination retail and high-quality public spaces.

CONSIDERATIONS

- Similar to the concerns on Secondary Planning above, the Town is receiving a number of applications which are ill-timed for various reasons (i.e. located within the proposed GTA West Corridor, lack of servicing available, lack of Secondary Planning, etc.). There is also a concern of MZOs being issued for these same lands. The Province can greatly assist its municipal partners in achieving the Housing Pledge if the Province either develops or supports municipalities in developing a growth prioritization strategy, and enforcing that strategy by excluding lands outside of that prioritization strategy from appeals and restricting the issuance of MZOs.
- The Town will need to continue to deliver non-residential development while delivering the housing pledge, and therefore the associated infrastructure will be required. Considering the Regional infrastructure required to support the housing pledge and to manage the associated impacts of delivering that infrastructure (i.e. time, cost, etc.), there is a concern that infrastructure to support non-residential land uses will be impacted.

Community Improvement Plans (ongoing and planned)

Caledon's Economic Development Strategy recommends progressive Community Improvement Plan (CIP) updates to enable development and intensification in key areas. It speaks to expansion of the use of the Town's CIPs to include development grants and tax incentives that:

- improve the use of land through re-development, infill and intensification;
- improve building infrastructure energy efficiency and aesthetics;
- diversifies the economy in key sectors; and,
- promotes tourism through product enhancements.

The Town will continue to use the Bolton CIP for supporting the Town's housing targets through infill and intensification. Also, Caledon East and Six Villages CIPs will be slated for updates within the next three years and the Town can re-prioritize the timing of the updates to support intensification in the rural and hamlet areas of Caledon.

Building Communities that Support Caledon's Housing Pledge Targets

Parks and Recreation Services

Caledon will require new parks to support not only our existing residents but also future residents and new neighbourhoods. The Bill 23 *Planning Act* amendments drastically reduce the amount of land that new developments must provide for new parks. Parkland in Caledon, funded from new development would be reduced by 80% to 87%.

Caledon's current parkland provision target is 2.7 hectares of active parkland per 1,000 population. As per preliminary analysis, the reduction in parkland dedication is almost 15 percent for lower density housing and 52 per cent for higher density housing. This will result in a reduction to Caledon's parkland to about 0.33-0.54 hectares of active parkland per 1,000 population: a decrease of 80% to 87%.

This reduction is reflective of both the exemption for affordable housing development and the reduced alternative requirement standards. As the Town expands into greenfield areas without access to existing parks, and as a variety of higher-density housing types are introduced, the need for park spaces for the health and well-being of our residents will be greater than ever.

Caledon's current parkland provision target is 2.7 hectares of active parkland per 1,000 population based on the current service level. Caledon will need to acquire 94.5 hectares of parkland by the end of 2031 to maintain the current service level for an additional 35,000 population. Parkland conveyance and payment in lieu of parkland provisions under the *Planning Act* will yield approximately 28 hectares of parkland by the end of 2031 and the shortfall of 66.5 hectares will need to be acquired through other means.

CONSIDERATIONS

- Bill 23 does not consider the effect of its parkland provisions on greenfield growth. In these growth areas there are no existing parks and new residents would have limited and inconvenient access to any existing parks. Furthermore, the Town does not have deep parkland reserves. Reconsideration of the Bill 23 parkland regulation is critical and greenfield growth communities should be exempted from the Bill 23 parkland regulations.
- To compensate for any parkland shortfalls arising from the changes to the *Planning Act* provisions, the Town will need to employ a range of alternate parkland purchasing mechanisms to get the required amount of parkland to support our residents. This may include purchasing passive land (not allowed to be developed) which may result in deficient parkland programming.
- In purchasing parkland, the Town would expect to locate parks in areas of growth to provide convenient access to our residents. The land values within the Town's growth areas are already increasing, therefore attributing to an increased cost to the Town, which will result in a drain on tax dollars and increase property taxes even further.

Community Recreation Centres

The Town's current DC Background Study lists two new recreation centres to support growth in planned locations in the Town – Mayfield West and Bolton, with cost estimates of \$56 million each. One of these recreation centres is well into the planning stages and is part of a financial agreement with the local developers. Numerous other recreation and park projects are also required to ensure complete communities (total investments of \$212.7 million).

CONSIDERATIONS

- With a lack of DCs as a result of Bill 23 and without any additional funding, these and future recreation centre projects are at risk. The recreation centres and communities that were contemplated in Mayfield West and Bolton, may not come to fruition.
- Bill 23 may change the collection of DCs from what was included in and planned for with existing financial agreements. The consequences of this have introduced unknowns into planning of Caledon's communities. This could leave the Town without funding to complete what has been started and what Caledon's residents are waiting for.

Fire and Emergency Services

The Town's Fire Location Servicing Study is critical to facilitate growth and ensure response times meet regulations. Fire Protection is critical to ensuring the safety of our residents. The Study shows that to maintain service levels to the community as it grows, six new stations (with land, new buildings and equipment) are required. In addition, facility expansions are required for four stations. These growth-related capital projects are of significant cost and the Town's DC reserve for Fire is already in the negative. Without full support for these costs from DC revenues, they may be beyond the capacity of the property tax base to support.

CONSIDERATIONS

- The Town advocates to the Province that emergency services should be included as housing enabling infrastructure and be made whole for the housing targets to be met.

Schools

School infrastructure is part of building a complete community. Caledon's schools are operated by Peel District School Board (PDSB), and Dufferin-Peel Catholic District School Board (DPCDSB) and French School Boards. School Boards determine the requirements for new school buildings based on community needs. Ministry of Education funding approval, municipal approvals, and construction timelines may result in changes to the potential occupancy date of new schools. The timing and size of new schools are reviewed annually and are subject to change based on confirmed growth and Ministry evaluation criteria.

PDSB's 2022/23 Annual Planning Document (APD) indicates that Ministry funding has been approved for PDSB's Caledon East P.S. (Replacement School), however, funding has not been approved for three schools in Caledon's Mayfield West Phase 2 community (currently under construction with homes being occupied).

CONSIDERATIONS

- A lack of school accommodation does not align with Caledon's aim to achieve complete communities. The Town requests the Ministry of Education review the funding process and school delivery models to ensure that funding is available to school boards in a timely manner as new greenfield communities develop in Caledon.
- School boards face challenges in securing registration of school blocks when the blocks belong to non-participatory landowners. The Province should empower school boards to secure land for schools at early/secondary planning stages, especially in greenfield (new) growth areas.
- School boards should also be empowered to enter partnerships with stakeholders including the Town, for joint use and creative development agreements. This will reduce the financial burden on not only School Boards but other stakeholders such as the Town of Caledon.
- The Town can explore providing potential support to school boards using Community Infrastructure and Housing Accelerators as allowed for education uses under the legislation.

Health Care

Health care planning in Caledon is within the purview of the Ministry of Health. Currently there are no public hospitals nor urgent care centres in the Town. Residents generally rely on Headwaters Hospital in Orangeville and Brampton Civic Hospital for their needs.

In October 2020, the Region of Peel accepted a donation of 20 acres of farmland for a future local health care facility from a Caledon resident. Twelve acres of the land are earmarked for a health-care facility and eight acres are set for seniors' housing.

The Town has envisioned healthcare development as a key component of the Bolton Roadmap approved by Council. Knowledge and Innovation Area includes healthcare and research uses, along with higher density employment uses, post-secondary facilities, government and complimentary residential uses.

CONSIDERATIONS

- There has been no study or engagement by the Province with the Town to review healthcare servicing needs - current nor future. The status and plan for the local health facility on the donated lands is also not clear. The Town advocates that the Province initiate this exercise and provide clarity on health care planning for

Caledon, so the Town can effectively plan for growth that includes essential facilities for the well-being of its residents.

Transit

Currently, local transportation in Caledon tends to be focused on southbound commuter movement and the area is very dependent on private cars. Most schools are serviced by a school bus network that limits teen mobility outside of school bus schedules. This particularly impacts teens before driving age, as well as seniors, especially during the winter months.

The Town, in partnership with Brampton Transit and a Contractor, provides basic transit service in specific areas of the Town: Mayfield West, Tullamore, and Bolton. In the near future, the Town intends to expand partnership with Brampton Transit to serve major collectors north of Mayfield Road.

Caledon's Economic Development Strategy includes consideration of on-demand transportation and/or ride sharing options that connect the core and villages to local and regional transport infrastructure for tourism and employment related purposes.

The current and anticipated growth in Caledon must be supported by a sustainable multi-modal transportation system that includes a strong, accessible, reliable, convenient and regionally connected higher order transit system. Moreover, the more transit Caledon has the more residents and housing it can support.

To support the planned growth, the Town will be developing a Transit Strategy in 2023 to identify:

- Governance and Management structure and Operating model – assessing the most applicable and feasible strategy for the Town to provide the Service, including:
 - Both internal organization or a separate department/section; and,
 - Responsibilities and the business model for transit operations, e.g., partnership with adjacent municipalities such as Brampton, buying a service from private sectors, or uploading the transit at the Regional Level.
- Five-year service plan, with options and recommended strategy, including routes, service level and associated cost estimates for both operational and capital costs from 2024 to 2028.

Caledon Multi-Modal Transportation Service Plan, Transit Feasibility Study, and Economic Development Strategy include consideration of micro-transit transportation for a longer term that is subject to feasibility, will connect the core and villages to local and regional transit networks.

CONSIDERATIONS

- As the Town develops its Transit Strategy and Service Planning Review to address future growth and housing targets in the next 10 years, it will advocate to the Province for continued support in meeting any funding shortfalls.
- Caledon may benefit from a Regional governance model for local transit, similar to the York Region model.

Community Benefits Charges

As other growth funding revenues from tools such as DCs and Parkland levies are expected to reduce, and higher density development applications are received, Caledon will need to ensure an alternative funding tool such as a CBC to address some of the funding shortfalls.

Caledon has not established a Community Benefits Charges (CBC) Strategy and By-law yet. The Town's 2022 Parks Plan will be implemented through the Official Plan, Parkland Conveyance By-law and CBC Strategy and By-law. The Town intends to initiate the CBC work in 2023, to coincide with the updating of the Town's DC Background Study and by-law in 2024.

CONSIDERATIONS

- Unlike established and built-out communities with a substantial amount of new high-density development, Caledon may not be able to generate revenues from CBCs by 2031. Moreover, exemptions related to Bill 23 may further reduce the CBC revenues.

Appendix III

Infrastructure Planning and Requests of the Province to Support Bill 23 Housing Targets

Joint Regional and Local Municipal Request for Provincial Commitments to Support Housing Pledges

For local municipalities to be successful in meeting the commitments outlined in their respective Housing Pledges, the Region of Peel, the Town of Caledon and the Cities of Brampton and Mississauga jointly require that the Province commit to providing the caveats outlined below.

Local municipal housing pledges have specific requests for Provincial commitments in order to meet their specific pledge targets. This document lists commitments required from a Region wide perspective and should be read conjunction with the detailed pledges submitted by local municipalities.

1. The development industry be required to sign pledges to demonstrate their commitment to building the units required to meet the Bill 23 housing targets.

Local and Regional municipalities are responsible to plan for new growth, provide hard and soft infrastructure services to support growth and review and approve development applications but do not construct new homes. The development industry should be required to sign housing pledges to demonstrate their commitment to the housing targets.

2. That the Province provide municipalities with the authority to impose a sunset clause for site-specific approvals should a building permit not be issued within a specified time-period.

Local municipalities have noted that there are thousands of units in Peel that have planning and development approvals in place but where a building permit has not been requested. These units are critical to municipalities being able to meet their housing pledge. It is recommended that the Province provide municipalities with the authority to implement a sunset clause for site-specific approvals to require that a building permit be issued within a certain time frame after receiving the necessary planning and development approvals.

3. The Province provide local and regional municipalities with any funding shortfalls as a result of Bill 23, related to providing all elements of complete communities for the residents that will be living in the 1.5 million homes to be built by 2031.

In order for local municipalities in the Region of Peel to meet the Bill 23 unit targets, accelerating growth nearly 2.5 times the growth planned for in the Provincially approved Region of Peel Official Plan to 2031 is required. To support this accelerated growth, there will be a corresponding need for accelerated provision of infrastructure and services provided by both the Region of Peel and the local municipalities to deliver all of the elements needed to support complete and safe communities.

In addition to the initial cost of providing the infrastructure, there will be new and ongoing costs related to operating and maintaining the infrastructure assets in a state of good repair as well as new or expanded facilities and fleet to deliver the services. With exemptions and changes to development charges, parkland dedication and the community benefits charges

resulting from Bill 23, municipalities anticipate funding shortfalls to support all the necessary infrastructure and services that come with growing communities as listed below and will require the Province to fund the gap.

Regional Infrastructure and Services Required for Complete Communities:

- Water and wastewater infrastructure
- Transportation infrastructure
- Police services, fleet and stations
- Paramedic services, fleet and stations
- Waste management services, fleet and facilities
- Climate change mitigation and adaptation – incremental cost to transition Regional services to current and future net zero emissions and extreme weather resiliency standards, including fleet, facilities and other infrastructure assets to service larger population
- Affordable Housing including funding current unmet housing need and additional need driven by the increased population
- Early Years and Child Care services including additional licensed child care spaces, EarlyON Centres, Special Needs Resourcing Services, Child Care Fee Subsidy and workforce.
- Income Supports including administrative funding to support Ontario Works caseload expansion and investments in social services to support life stabilization, especially mental health supports.
- Social Services Not-for-Profit Sector will require new and expanded not for profit organizations to provide services to vulnerable and at-risk populations.
- Public Health costs related to mandated public health programs and services to keep people healthy and prevent illness such as health inspections, infectious disease management, immunizations, children's and senior's dental care, and childhood growth and development, among others. Increased growth will further exacerbate existing provincial public health funding gaps.
- Seniors' Services including funding existing shortfalls in Adult Day Services and Long-Term Care and additional need driven by the increased population

Local Infrastructure and Services Required for Complete Communities:

- Local transit services for increased population as well as fleet, garages and corridor construction
- Transportation infrastructure including local roads and active transportation
- Parks, recreation facilities and other community facilities
- Library services
- Fire protection services
- Stormwater management
- Climate change related initiatives
- Works/operations yards and facilities

- Utilities – full cost of electricity capacity upgrades required to meet higher electricity demand due to electrification of facilities, transit, fire trucks, etc.

Other Services

In addition to the need to accelerate regional, and local infrastructure and services there will also be the requirement for the Province to ensure provincial services are available for the increased population, some of the most critical include schools, hospitals, and other health facilities.

Investment in healthcare is critical in Peel to meet the per-capita provincial average for the current population as well as to meet future healthcare needs associate with the additional growth from Bill 23.

The Province should also prioritize and expedite the in-service time of planned GO rail service and stations to facilitate housing pledge-related housing supply in Major Transit Station Areas.

4. Financial Strategies and Tools to Support the Increased Growth

The Region has developed preliminary recommendations on how to respond to the increased municipal growth targets under Bill 23 and opportunities to build more homes faster. The following financial actions are recommended to the Province for consideration and action to make municipalities whole.

Action 1 - To reimburse the reduction in DC Revenue

Each municipality is made whole on financial losses related to Bill 23. The reimbursement should be made on annual basis.

Action 2 - To fund/finance the advanced growth capital expenditures

To advance the growth, accelerated capital infrastructure (preliminary estimate \$20 billion) would be required to be emplaced prior to development (i.e. DC revenues). Since there is no surplus fund in the Regional DC reserve fund, the capital expenditures would have to be financed through debt or be funded through tax and utility rate increases. Staff's analysis and discussion with the investment community concludes that this level of municipal borrowing is simply not feasible. Therefore, a combination of new provincial funding programs and innovative provincial financing solutions are required. The split of funding and financing should recognize that municipalities cannot borrow amounts that result in debt servicing costs exceeding the provincial ARL limit.

All levels of government and the development community are encouraged to work together to design and implement these funding programs while ensuring outcome-based commitment and accountability of all participants.

Action 3 - To fund/finance the increased and accelerated service demand impacted by quicker growth

Additional measures and interim funding are required to assist municipalities to address funding needs for affordable housing, as well as sudden rising service demands in services such as police, paramedics, waste management, fire protection and transit resulting from accelerated and increased growth.

Action 4 – Streamline Provincial processes related to infrastructure planning and approvals

The Province should review and simplify their processes related to infrastructure planning and approvals including environmental assessments, stakeholder consultation, certificates of approval, excess soil management and permits to take water.

Memorandum

Date: February 21, 2023

To: Members of Council

From: Stephanie McVittie, Manager, Development, Planning Department

Subject: Status Update on Action Items in Response to Bill 109

This Memorandum is to provide an update on the status of action items which were identified as part of the Town's response to Bill 109, the More Homes for Everyone Act, 2022.

This Memorandum will be attached as a supplementary document to Staff Report 2023-0128: Caledon's Housing Pledge to the Province of Ontario (Bill 23) and will be forwarded to the Ministry of Municipal Affairs and Housing together with the Staff Report.

Bill 109, the More Homes for Everyone Act, 2022

On March 30, 2022, the Provincial Government introduced Bill 109, the *More Homes for Everyone Act, 2022*. The Province gave third reading and Royal Assent to the Bill on April 14, 2022, with the Bill coming into effect on the same day, (unless otherwise noted). The intent of this Bill is to address the housing supply shortage in Ontario.

The Bill included a number of changes to the *Planning Act* including but not limited to:

- The allowance for Site Plan applications to be subject to pre-consultation and 'complete' application requirements
- Refunding of fees for Zoning By-law Amendment and Site Plan applications, on a fee reduction scale, where decisions are not made within 90 days and 60 days, respectively, of a complete application
- Discretionary authority to re-instate lapsed draft plans
- Introducing a Community Infrastructure and Housing Accelerator Tool
- Discretionary authority for the Minister to extend the timelines on which their decisions on Official Plans and Official Plan Amendments may be made
- Introducing a new regulation to allow owners to use surety bonds to secure agreement obligations

Staff Report 2022-0209: Impacts of Bill 109, the More Homes for Everyone Act, 2022 and A Recommended Path Forward

On June 21, 2022, Planning staff brought forward Staff Report 2022-0209 which outlined the details of the Bill and the Town's response. While staff support the goal to improve the housing shortage and the streamlining of processes, there were concerns related to the implications and unintended consequences

of the Bill. This report outlined these concerns and also identified a number of action items to be completed in response to the Bill. Please see Schedule ‘A’ to this Memorandum.

New Development Approvals Process

The Town is initiating a comprehensive process review for Draft Plan of Subdivision and Site Plan applications, as well as a fee review for all planning applications. However, it was necessary to undertake some immediate interim process improvements to respond to the Bill.

With a reduced timeframe to approve applications, the new development process:

- Provides a more thorough review of development proposals prior to formal applications being completed, to deliver more guidance, comments and a clear description of application requirements to the client.
- Moves the cyclical review of application submission material to earlier in the process, prior to a formal application being submitted. This ensures that applications being received are not only complete, with all necessary material to review the application, but also that the material content itself is accurate and is completed by accredited professionals.

The new development process is outlined at a high-level in the process flowchart and description below.

1. **Inquiry Meeting:** This is an optional meeting held one-on-one between a client and a development planner to discuss a proposed development project. There is no fee associated with this meeting. The client is provided with comments, direction and application requirements outlined in the meeting and in an Inquiry Meeting Checklist/Form.
2. **Preliminary (PARC) Meeting:** This meeting is mandatory prior to submission of an Official Plan Amendments, Zoning By-law Amendments, Plans of Subdivision and Condominium, Site Plans and Telecommunication Facilities. There is a fee associated with this meeting. The client meets with Planning staff in addition to external agencies and internal departments. A more in-depth review is completed, and the client is provided with comments, direction and ‘complete’ application requirements outlined in the meeting and in a Preliminary (PARC) Meeting Checklist/Form. The form identifies all decisions or applications required and also includes reference to scope, and terms of reference or guiding documents to assist the applicant in completing the required materials and documents.
3. **Pre-Consultation (DART) Review:** This is a new process and is an application required prior to the submission of an Official Plan Amendments, Zoning By-law Amendments, Plans of Subdivision and Condominium and Site Plans. This application is essentially the circulation review period which previously existed in the formal application process. It includes a review of all submitted application material by external agencies and internal departments to ensure that the submitted material is satisfactory, accurate and completed by accredited professionals.

4. **Formal Application Submission and Decision:** Once the Pre-Consultation (DART) Review process is satisfactorily complete, the client will make the formal application submission, with the exception of Telecommunication Facilities which are not required to proceed through the DART Review. For Site Plans, the application process is limited to addressing legal and financial requirements prior to obtaining Site Plan Approval. Plans of Subdivision and Condominium submissions will include finalizing draft plan conditions prior to the issuance of Draft Plan Approval. The remaining application types will require public notice and a public meeting be held, prior to a recommendation report being prepared for Committee and Council.

Status of Action Items in Response to Bill 109

There were 21 action items identified in the Staff Report, of which 13 are completed. The remaining 7 action items are underway with completion anticipated in 2023.

The table below identifies those action items and provides a status of each.

Memorandum

Bill 109 Action Items and Their Status

Action No.	Action	Status
1	To request that Council direct staff to initiate an Official Plan Amendment to amend the pre-consultation and complete application requirements in accordance with Bill 109 and this Staff Report.	In Progress Staff are drafting the Official Plan Amendment and will be proceeding to a public meeting in Q1 2023.
2	To request that Council repeal and replace the Town's Pre-Consultation By-law, clarifying the requirements for pre-consultation and complete application requirements.	Completed June 28, 2022 Council passed this by-law June 28, 2022
3	To request that Council enact an amendment to the Town's Site Plan Control By-law, providing for urban design review in accordance with the <i>Planning Act</i> .	Completed June 28, 2022 Council passed this by-law June 28, 2022
4	To enhance the Preliminary Meeting process, providing a more structured process and a new Preliminary Meeting form which will guide applicants through the planning process.	Completed September 5, 2022 Staff introduced a new 'Inquiry Meeting' process on September 5, 2022. This process includes the delivery of a new form/checklist to the client with comments and application submission requirements.
5	To enhance the Pre-Consultation (DART) Meeting process, creating an updated Pre-Consultation (DART) Meeting form providing guidance and detailed complete application requirements for applicants with an expiry date of 4 months instead of 6 months.	Completed September 5, 2022 Planning staff introduced a new 'Preliminary (PARC) Meeting' process on September 5, 2022. This updated process includes: <ul style="list-style-type: none"> • An updated new form/checklist which identifies comments and application submission requirements. • Providing more detailed comments on requirements including identifying terms of references and scope for plans/drawings/reports. • Delivery of a draft form/checklist to the client prior to meeting with staff and agencies to focus discussion on items that are of most importance to the client. • A 4 month expiration for the PARC Meeting.
6	To request that Council delegate authority to the Chief Administrative Officer to award and sign single source contracts to retain a consultant(s) to develop Terms of Reference for all supporting studies/materials required as	In Progress <ul style="list-style-type: none"> • Planning Terms of Reference: Being finalized by the consultant for use in February 2023.

Action No.	Action	Status
	part of a complete application, to an upset limit of \$75,000 funded from the Development Approvals Stabilization Reserve Fund.	<ul style="list-style-type: none"> Heritage Terms of Reference: Under review, being finalized by the consultant for use in February/March 2023. Urban Design Terms of Reference: Discussions underway with consultants and completion targeted for April 2023. Landscape Terms of Reference: Discussions underway with consultants and completion targeted for April 2023. Engineering Terms of Reference: Being finalized in consultation with other departments, the Region of Peel and Conservation Authorities. Completion targeted for April 2023.
7	<p>To strengthen the 'complete' application requirements, setting a clear expectation of the type and quality of application material, requesting the following items be submitted (in addition to what would normally be required now):</p> <ol style="list-style-type: none"> Public Engagement: For any development application with a public consultation process prescribed in the <i>Planning Act</i>, the applicant/owner will be required to host at least one public engagement session prior to application submission. Indigenous Consultation: The applicant/owner will be required to host at least one engagement session with indigenous communities prior to application submission. Clearance from External Agencies: The applicant/owner will need to provide: <ul style="list-style-type: none"> Approval of the application from the Ministry of Transportation/Ministry of Municipal Affairs and Housing where it is located within the GTA West Corridor; Approval from the Niagara Escarpment Commission (if required) within the Niagara Escarpment Planning Area; 	<p>Partially Completed</p> <ul style="list-style-type: none"> Completed September 5, 2022: The 'complete' application requirements have been outlined on the Preliminary (PARC) Meeting Checklist/Form and includes all items listed in Action 7. In Progress: The Town is developing a Terms of Reference on how to engage the public through the Pre-Consultation (DART) process in advance of submitting a formal application. This will include a review and enhancement of all development planning public notices for all application types. Estimated completion is Q2 2023. In Progress: The Town is developing a Terms of Reference on how to engage with indigenous communities. Estimated completion is Q2 2023. In Progress: The Town is developing Green Development Standards with an estimated completion of Q4 2023.

Action No.	Action	Status
	<ul style="list-style-type: none"> ○ Road Access Approval from either the Region of Peel or Ministry of Transportation, confirming location, type and capacity; ○ Servicing Approval from the Region of Peel, confirming servicing requirements and capacity are present or have been committed to; ○ Approval of the Limits of Development from the applicable Conservation Authority; and, ○ Acceptance of all required archaeological assessments from the Ministry of Heritage, Sport, Tourism and Culture Industries. <p>d. Confirmation of Parkland Requirements: Where parkland dedication is applicable, confirmation of the park size, location and configuration or where cash-in-lieu of parkland is required, the rate of how it is to be paid and a satisfactory appraisal.</p> <p>e. Confirmation of School Sites: Where land for schools is applicable, confirmation of the parcel size, location and configuration is required.</p> <p>f. Confirmation of Other Community Infrastructure: Where lands for community centres, fire halls and/or works yards are applicable, confirmation of the parcel size, location and configuration is required.</p> <p>g. Acceptance from Peer Reviews: Where the Town requires peer reviews to be undertaken, typically for noise, hydrogeological, agricultural impact assessments, etc., the Town will, through the Pre-Consultation process, complete all peer reviews prior to the application being deemed “complete”.</p>	

Action No.	Action	Status
	<ul style="list-style-type: none"> h. Zoning Certificate: The Town will require a zoning certificate be completed to ensure the application conforms to the Zoning By-law. i. Record of Site Condition: Where a record of site condition is required, one is to be submitted. j. Green Development Standards: Once developed, the Green Development Standards will be required. 	
8	To require that a Regional Official Plan Amendment be approved (where required), prior to accepting development applications.	<p>Completed September 5, 2022: This requirement is reflected on the Preliminary (PARC) Meeting Checklist/Form and is required for development where lands are not designated for the proposed use in the Regional Official Plan.</p> <p>NOTE: All lands within the Settlement Area Boundary Expansion (SABE) are no longer required to obtain a Regional Official Plan Amendment unless the use differs from the use permitted in the Regional Official Plan.</p>
9	To require that a Secondary Plan be approved, prior to accepting an application for urban uses outside of a settlement area. The Town will move forward with Town-initiated Secondary Plans, rather than privately-initiated Secondary Plans.	<p>Completed September 5, 2022: This requirement is reflected on the Preliminary (PARC) Meeting Checklist/Form and is required for development where lands are not within an existing Town of Caledon Settlement Area.</p> <p>There is a related requirement reflected on the Preliminary (PARC) Meeting Checklist/Form which requires that the Growth Management and Phasing Plan be completed and that the proposed development aligns with that Plan.</p> <p>NOTE: Lands within the Settlement Area Boundary Expansion (SABE) are required to have a Town-initiated Secondary Plan be approved and in effect before an application is received.</p>
10	To require that applications be received and processed one after another ensuring conformity documents are in place, no longer permitting the submission of concurrent development applications. For instance, prior to submitting	<p>Completed September 5, 2022: This requirement is reflected on the Preliminary (PARC) Meeting Checklist/Form.</p> <p>The Pre-Consultation (DART) Review process will allow for applications to be processed concurrently; however, the formal</p>

Action No.	Action	Status
	a Site Plan application, a Zoning By-law Amendment application must be approved and in full force and effect.	application (i.e. Site Plan) will require all higher-level approvals be in place (i.e. Zoning).
11	To require that where public infrastructure is proposed, a Draft Plan of Subdivision be required, no longer permitting the creation of public infrastructure through Site Plan applications.	Completed September 5, 2022: This requirement is reflected on the Preliminary (PARC) Meeting Checklist/Form and is being communicated to the client.
12	To request that Council delegate the re-instatement of draft plan approval (where draft plan approval has been lapsed for less than 5 years) in accordance with the <i>Planning Act</i> .	Completed June 28, 2022 Council passed this by-law June 28, 2022
13	To review the dates, timelines, and procedural matters related to public meetings, Committee and Council Meetings, to ensure that there are available dates to bring matters forward to make decisions in a timely manner.	Completed December 2022 Prior to the establishment of the Council and Committee Schedule, Planning staff consulted with Corporate Services staff to ensure that sufficient meetings were provided for 2023 based on current application volumes.
14	To commit to investigate other means to meet processing timelines, with refusal being the last resort to avoid refunding of application fees.	Ongoing: The Town will continue to explore process improvements, on an ongoing basis.
15	To request that Council delegate authority for the Lifting of Holding ("H") Symbols.	Completed June 28, 2022 Council passed this by-law June 28, 2022
16	To request that Council delegate authority for exemptions for standard, phased and leasehold condominium plans from the "full process" under the <i>Planning Act</i> as allowed for under the <i>Condominium Act</i> when the condominium is located on lands which have been subject to an approved Draft Plan of Subdivision, privately initiated zoning amendments and/or site plan.	Completed June 28, 2022 Council passed this by-law June 28, 2022
17	To request that Council direct staff to determine if a Community Planning Permit System may be applicable in the Town, streamlining and reducing processing timelines, replacing Zoning and Site Plan application processes.	In Progress Staff has included a funding request related to exploring the Community Planning Permit System.

Action No.	Action	Status
18	To direct staff to bring forward a procedure to manage potential Ministerial Zoning Order requests in 2023.	In Progress Staff are developing the procedure and anticipate bringing it forward to Committee and Council in Q2 2023.
19	To add the concerns listed in this report to its active advocacy file list including a request to delegate the Minister of Municipal Affairs and Housing at the upcoming Rural Ontario Municipal Association (ROMA) Conference.	Partially Completed <ul style="list-style-type: none"> Completed January 23, 2023: Caledon's delegation met with the Minister of Municipal Affairs and Housing, Hon. Steve Clark, regarding Bill 23 concerns. In Progress: The file remains active. Staff are following-up with the Minister to continue advocacy and collaborate on solutions.
20	Complete an interim update of Planning fees to address the potential decline in revenues and increase in costs, as well as the changes to the development approval process.	Completed July 19, 2022 Updated Fees By-law approved by Council on July 19, 2022. Note: Ultimately, as part of the Site Plan and Subdivision process review, a comprehensive fee review will be completed for all Planning Fees.
21	The Town's capacity to process development applications will need to increase to manage the condensed timelines. Through the comprehensive process review and budget process, staff will identify opportunities to increase capacity. Staff will also review whether there is a need to attract specialized technical staff, such as environmental planners and specialized engineering staff, to reduce dependency on peer reviewers and conservation authorities, and in turn reducing processing timelines.	In Progress Through the budget, staff has requested additional resources to assist in the response to Bill 109. Ultimately, as part of the Site Plan and Subdivision process review, staff will identify opportunities to increase capacity.
