

Appendix I - Health and the Built Environment - Opportunities in Land Use Planning

Healthy Development Framework Application Data, 2017 to 2022

Number of Development Applications that Underwent a Formal Health Assessment, and Met or Exceeded a Pass Score, Brampton, Caledon, Mississauga and Total, 2017 - 2022

		Brampton ¹	Caledon ^{2,3}	Mississauga ⁴	Total	Percent ⁵
2017	Formal health assessment	30	9	1	40	
	Met or exceed a pass score	17	8	1	26	65%
2018	Formal health assessment	47	10	6	63	
	Met or exceed a pass score	37	8	5	50	79%
2019	Formal health assessment	59	6	25	90	
	Met or exceed a pass score	42	6	21	69	77%
2020	Formal health assessment	64	6*	9	79	
	Met or exceed a pass score	57	6	9	72	91%
2021	Formal health assessment	74	13	0	87	
	Met or exceed a pass score	68	11	0	79	91%
2022	Formal health assessment	75	20	0	95	
	Met or exceed a pass score	70	20	0	90	95%

¹Scores reported for the City of Brampton are derived from the City of Brampton's Sustainable Assessment Tool. In July 2022, the City of Brampton updated their tool under the Sustainable New Communities Program.

²Score reported by the Town of Caledon are from the Region of Peel's Healthy Development Assessment.

³Scores reported for Town of Caledon are only reported for residential and mixed-use development. Currently, the metrics in the HDA cannot be applied to industrial, commercial, and institutional development applications, which results in fewer development applications being assessed by the HDA.

⁴Scores in 2017 for the City of Mississauga are from the Region of Peel's Healthy Development Assessment tool for large-scale plans. Scores in 2018-2020 for the City of Mississauga are from the Healthy by Design Questionnaire Pilot Project, which ended in 2020. Since 2020, they are paused.

⁵Percent of total formal health assessments completed that met or exceeded a pass score.
