Tweeting fake stats once apparently isn't good enough for Mayor Brown. He had a 2nd go at it a whole day after being notified of his error, giving residents the previous day's fake update for the 2nd time, no actual update for the 31st. Does he even bother to read what he tweets?

Dear Regional Council,

Without getting into deeper and far more disturbing details of the so-called "pandemic", I hope we can all agree that our local media and politicians (*including the head of Brampton's Reopening and Recovery Working Group*) have spread some obvious misinformation today, even from the point of view of "COVID19" believers.

Mayor Brown, Councillor Medeiros and our local media disseminated the following fake #covid19 stats today, referring to so-called "confirmed and probable" cases as simply "confirmed", spreading even more unnecessary, disease-causing fear than the province and Region.

Screenshots attached.
