

## Appendix III

### 2024 Housing Services Annual Report

#### HOME Advocacy Framework

In May 2022, Regional Council approved advocacy priorities to address the affordable housing crisis. To strengthen communication and engagement, these priorities were packaged into the **HOME Framework**, which outlines four guiding principles for housing policy and program development.

While increasing housing supply is important, market-driven development alone cannot solve the crisis. The **HOME Framework** promotes a balanced approach that maximizes existing housing, expands non-profit and supportive housing, and ensures residents can maintain stable, affordable homes. Peel Region continues to advocate to federal and provincial governments for policy, program, and funding changes that reflect these principles and advance housing as a human right.
